

# BRING YOUR IDEAS TO LIFE

The leading professional interior design software for the tiling and furnishing industries.

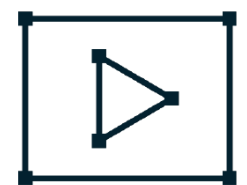

DomuS3D is the professional interior design tool to meet all your needs as a designer, from start to finish for any interior project. Starting from custom 2D layout design, to easy floor, wall, and material selection, to HD renderings and VR previews.

OPTIMIZED FOR EVERY NEED: FROM 2D CAD TO TILING, RENDERING, AND PROJECT SHARING.

DAILY UPDATES FOR A SEAMLESS DESIGN EXPERIENCE.

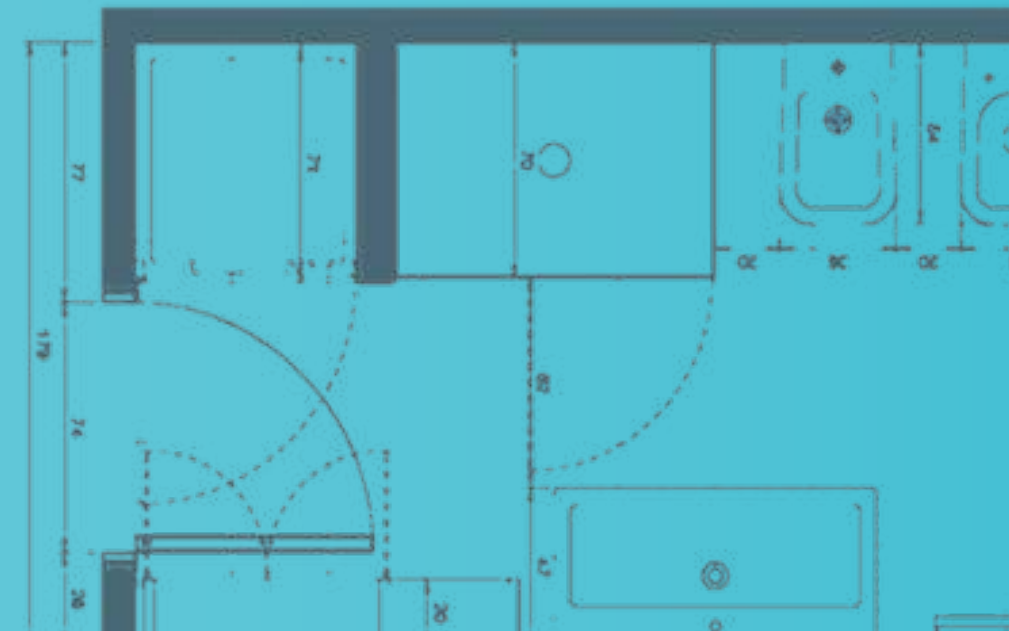

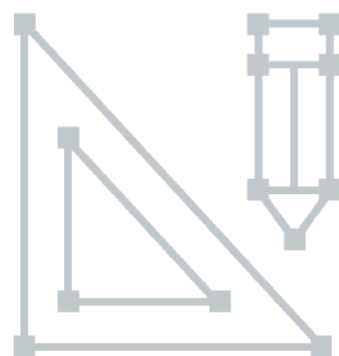

COMPLETE TUTORIALS AND FREE TRAINING TO FULLY UNLOCK THE POTENTIAL OF THE SOFTWARE.

# MUCH MORE THAN JUST SOFTWARE

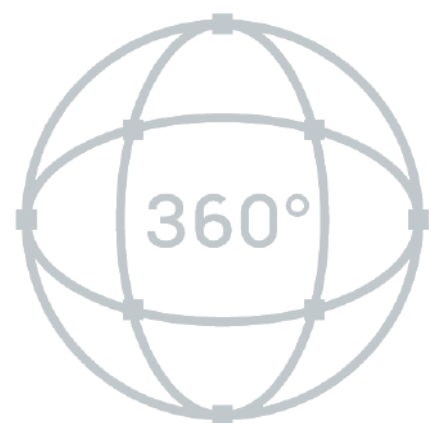

DomuS3D is a software system specifically designed to offer clients a **complete and professional design** service, quickly and efficiently. All this through the creation of realistic, high-quality 3D rooms, which allow you **to be more convincing with your client**, facilitating the entire sales process.

# COMPREHENSIVE DESIGN

Versatile, Easy to Use, Access to Huge Online Libraries. DomuS3D gives distributors, retailers, and designers the ability to **create and present realistic custom interior designs within minutes**, exciting their clients and satisfying their every design need.

# FEATURES

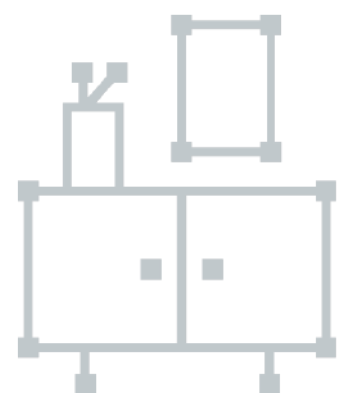

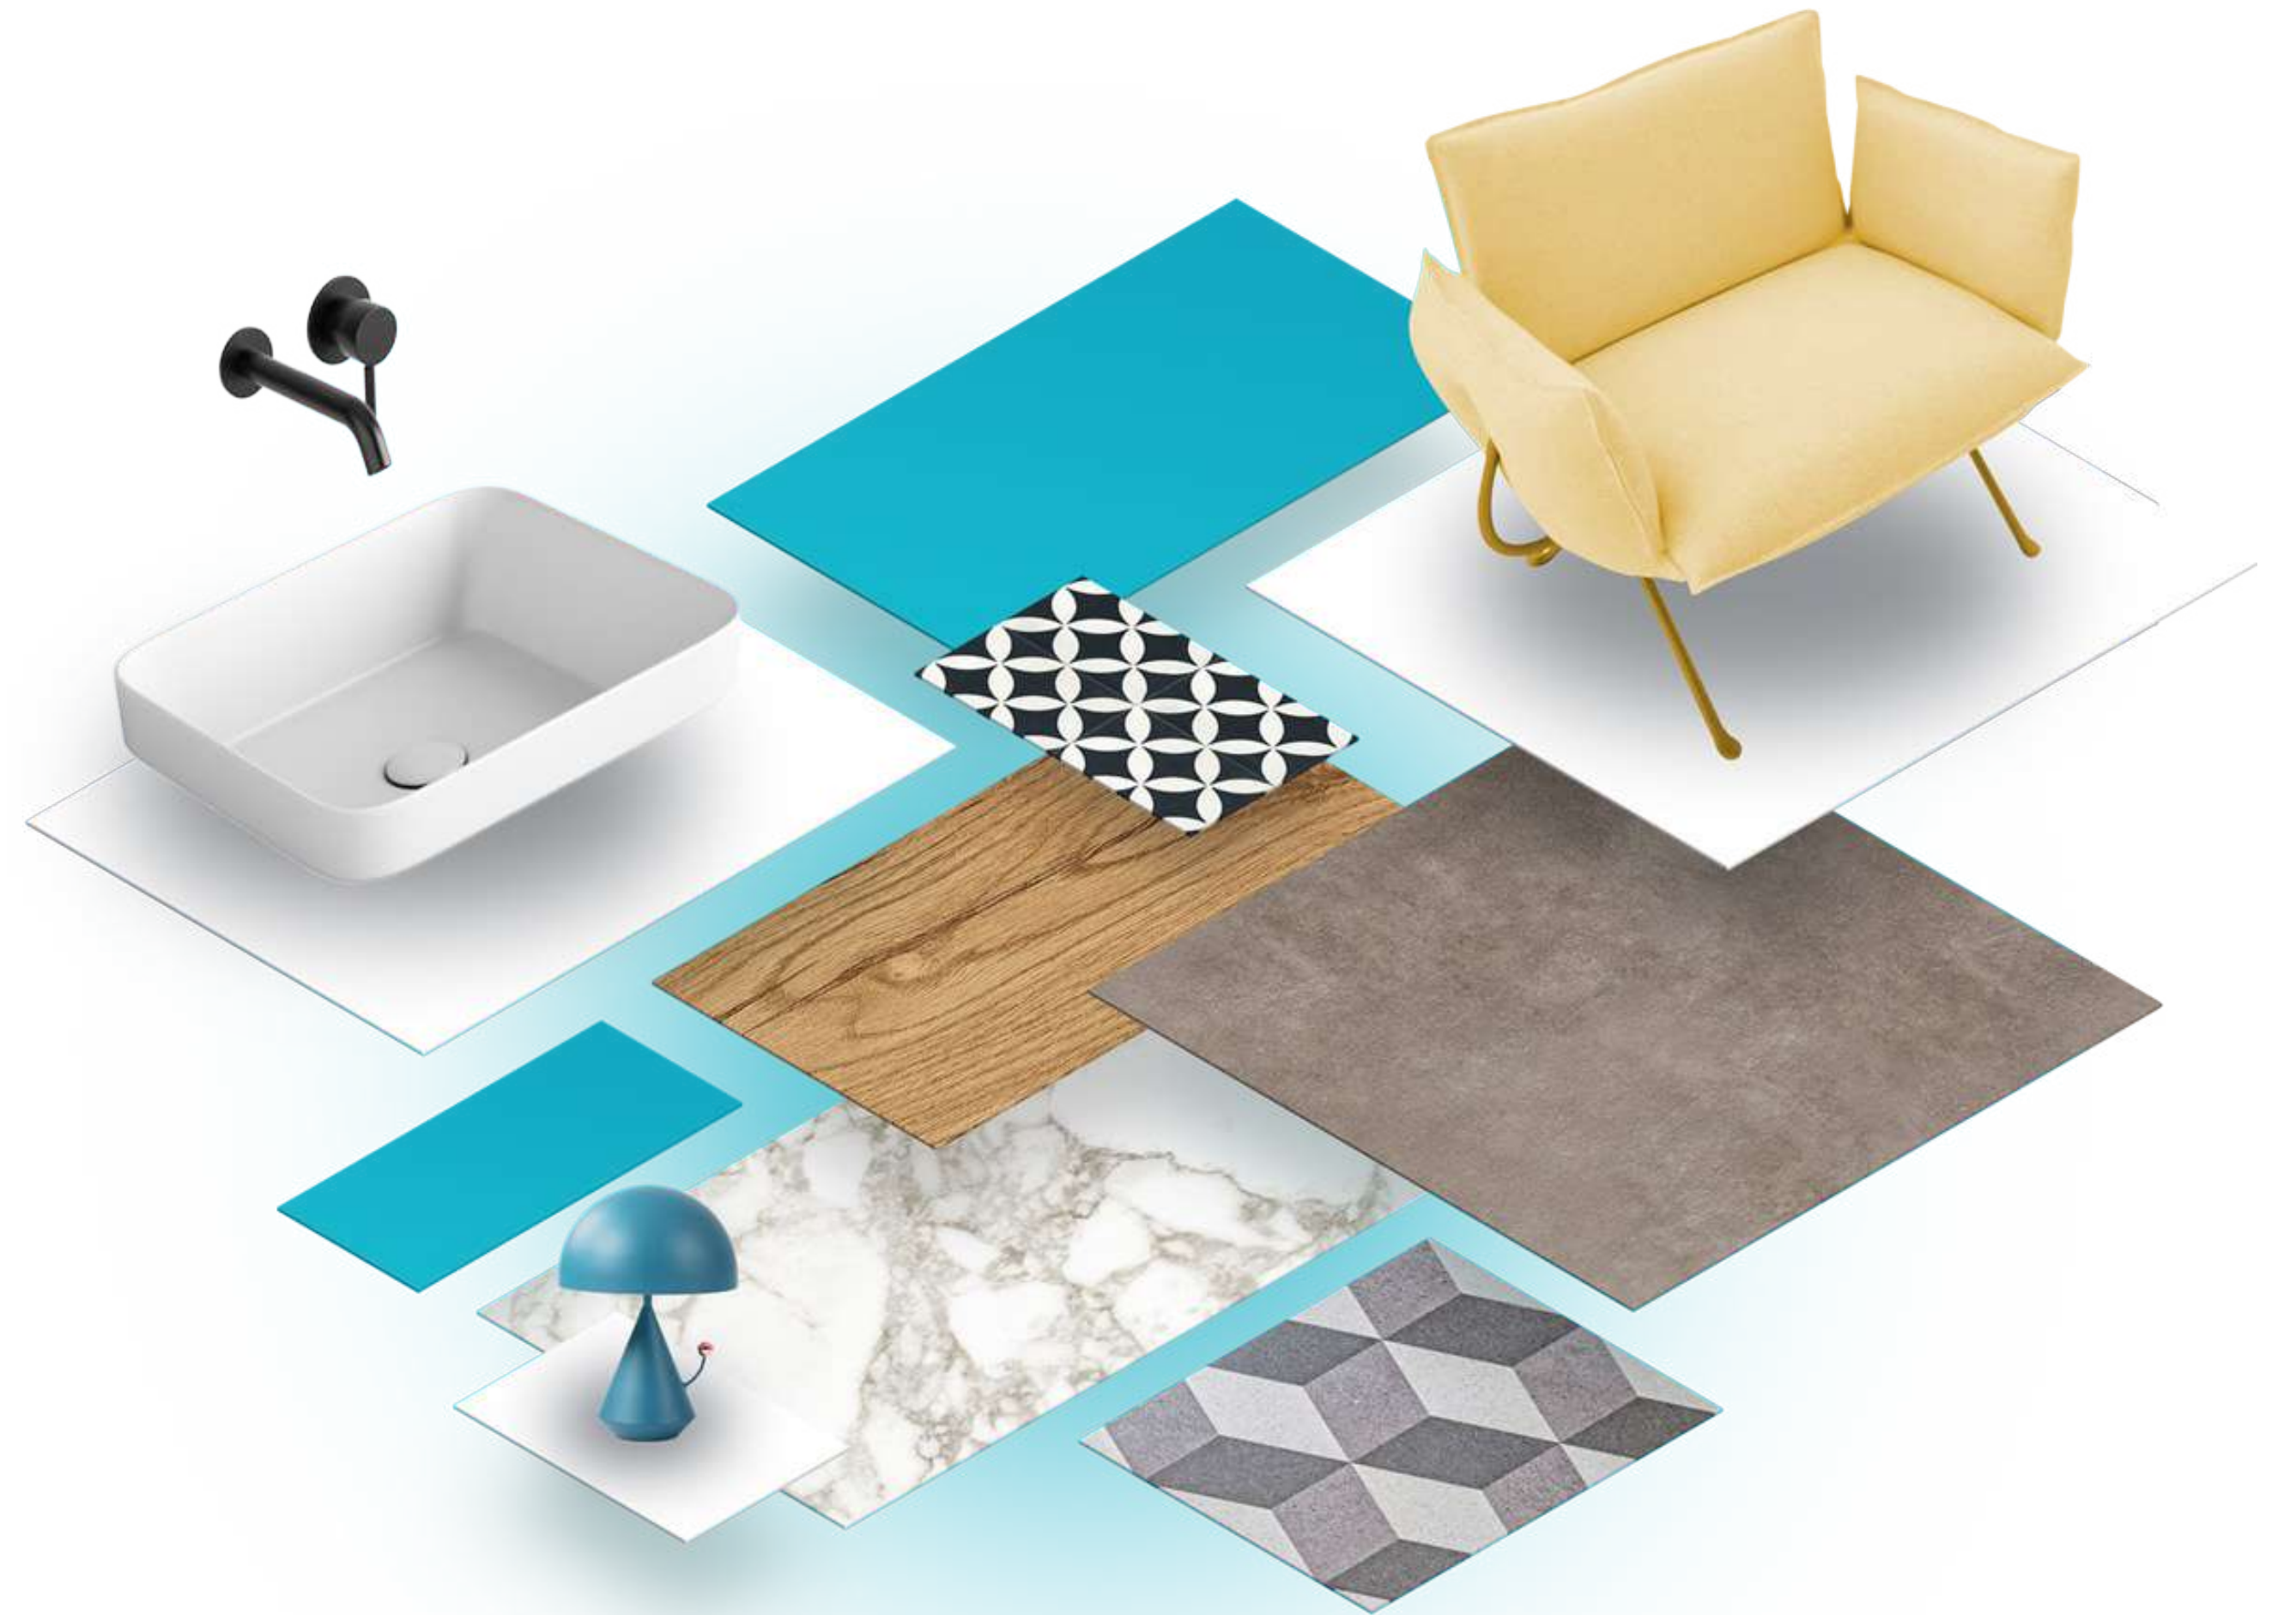

- Vast product library for tiles and furnishings
- Configurable Furniture Module
- Open system
- V-Ray rendering
- Render Manager engine
- Virtual Reality
- Project sharing with DomuS3D 360
- Estimates, blueprints, and brochures
- Online Support website and remote tech assistance
- Training courses
- Online tutorials

# A VAST PRODUCT LIBRARY AT YOUR FINGERTIPS

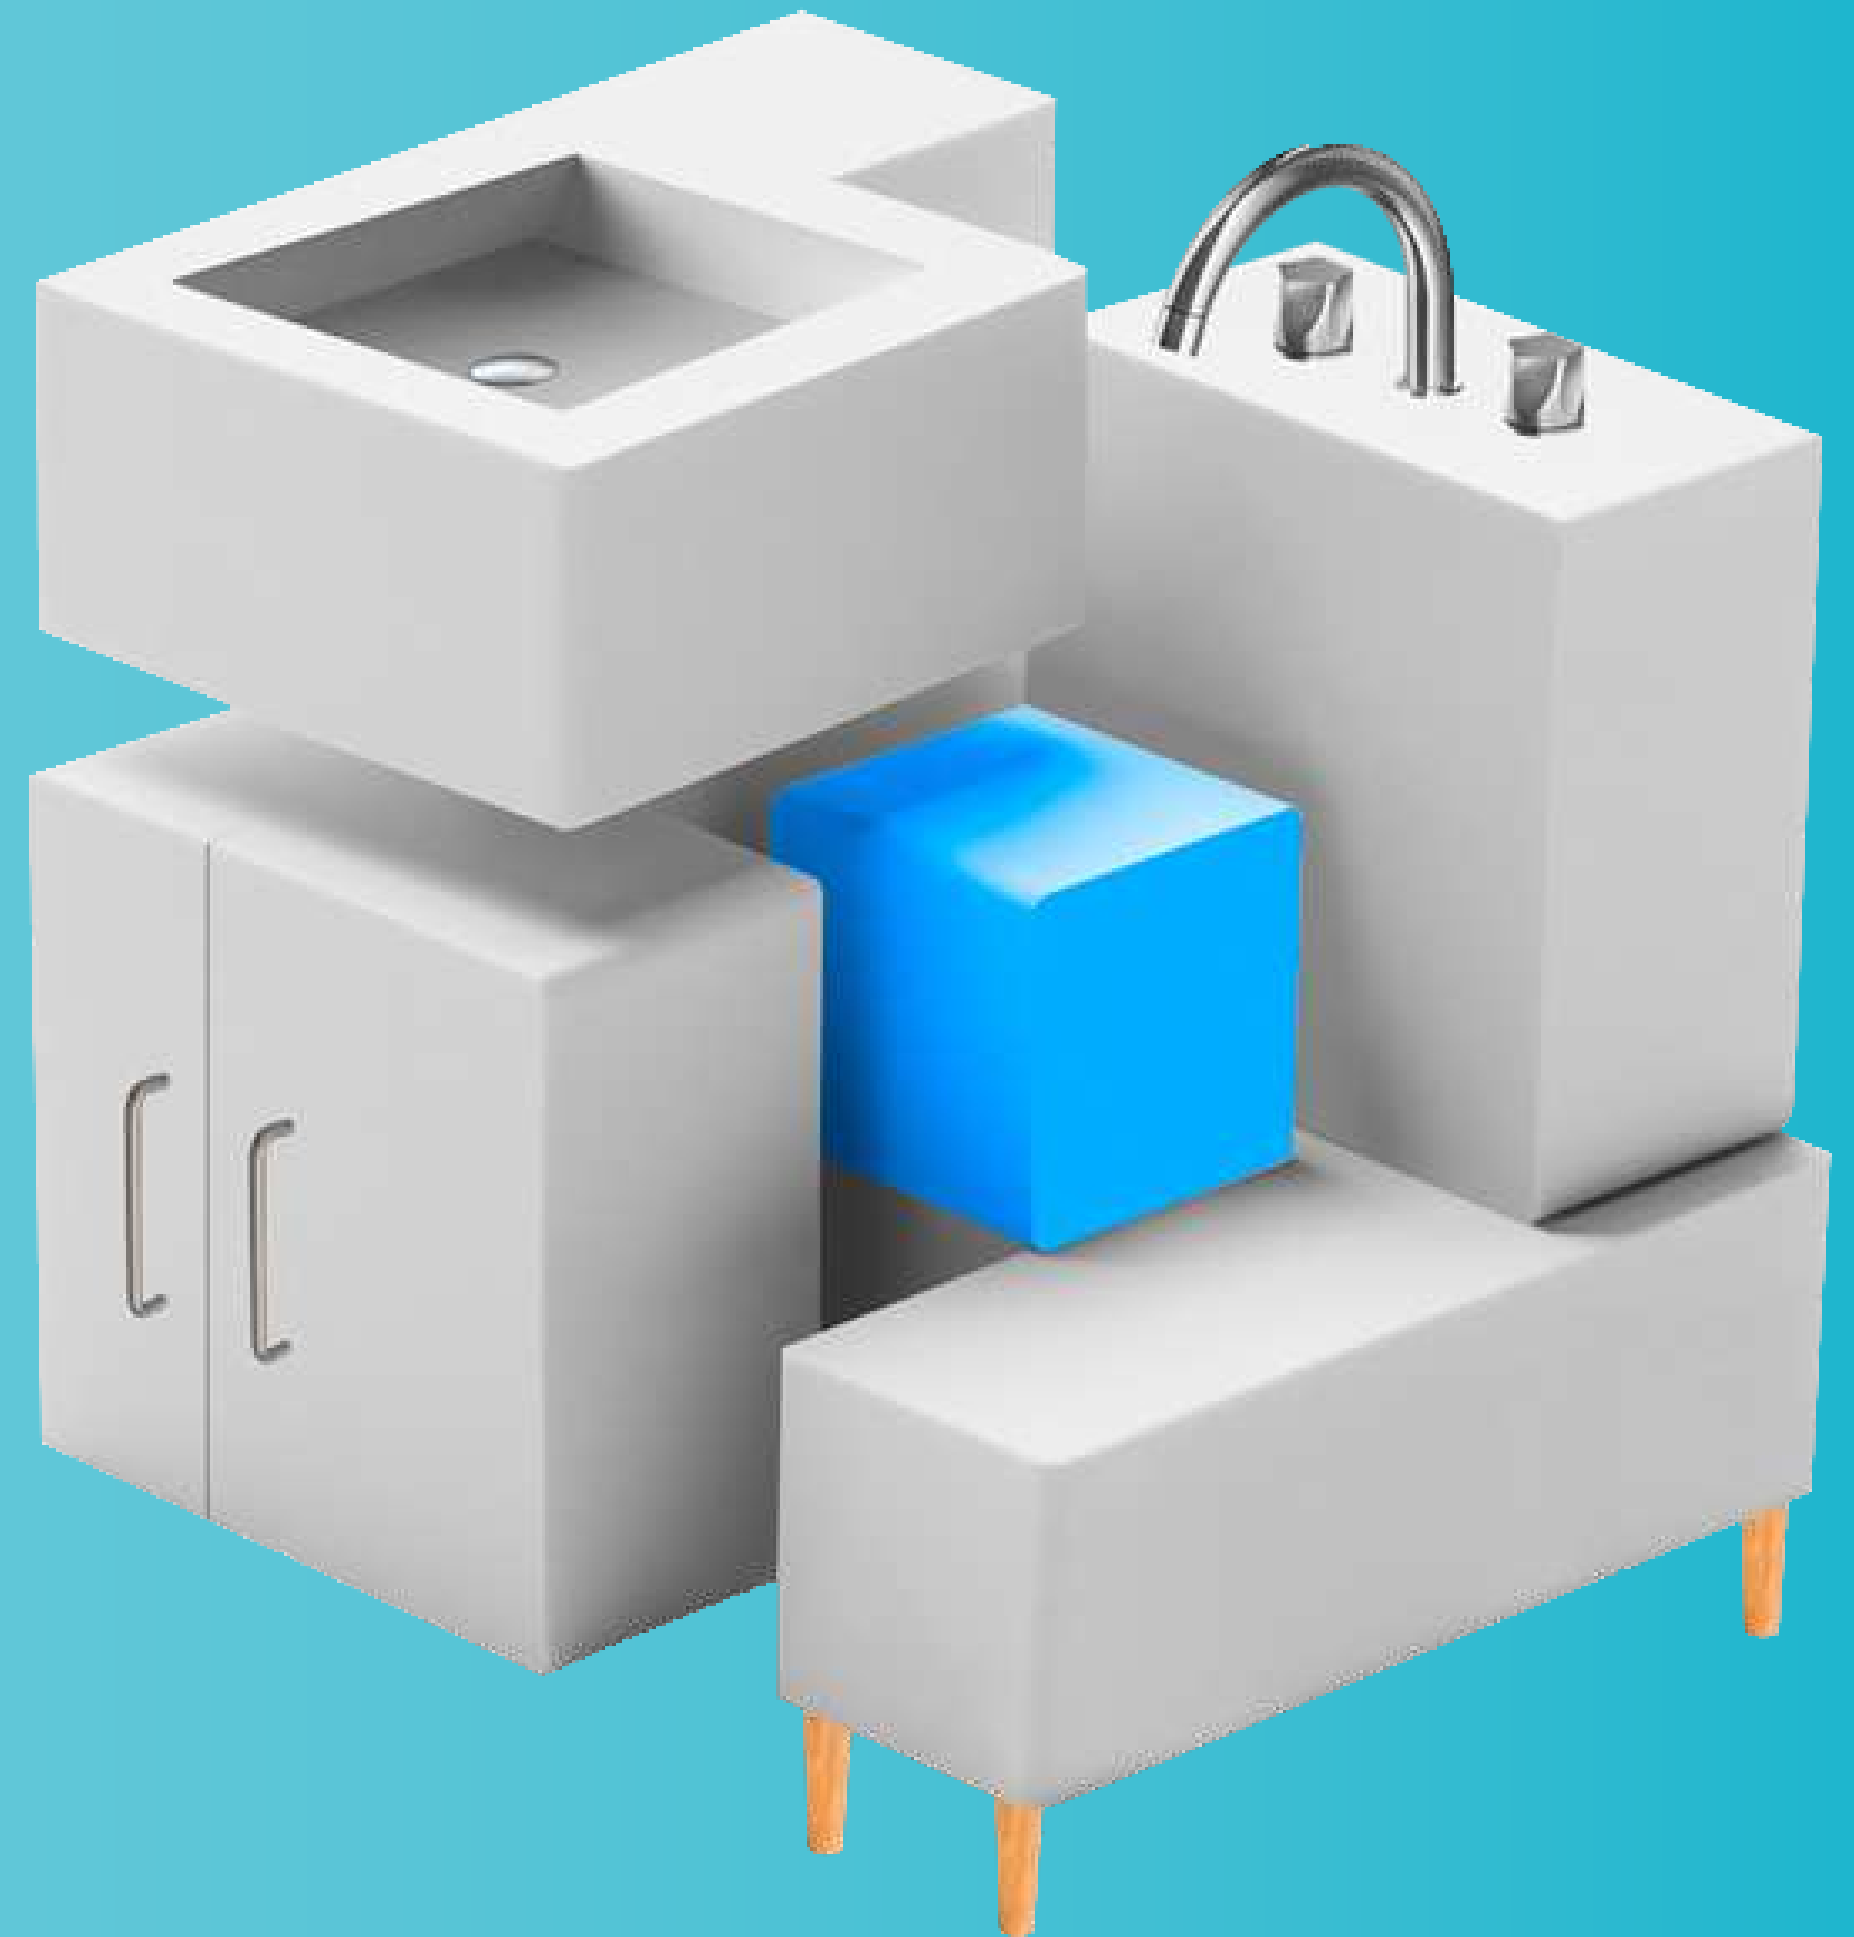

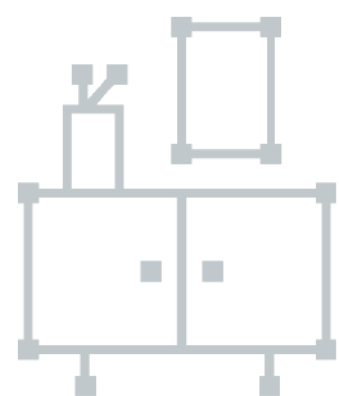

Our libraries are constantly updated and have thousands of available products, from tiles to designer furniture. Each item curated to the smallest detail to guarantee the highest level of **realism** possible when rendering, all within an aesthetic context built on excellence.

# CONFIGURABLE FURNITURE MODULE

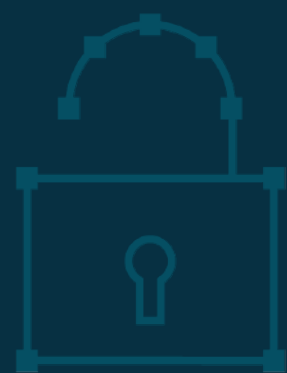

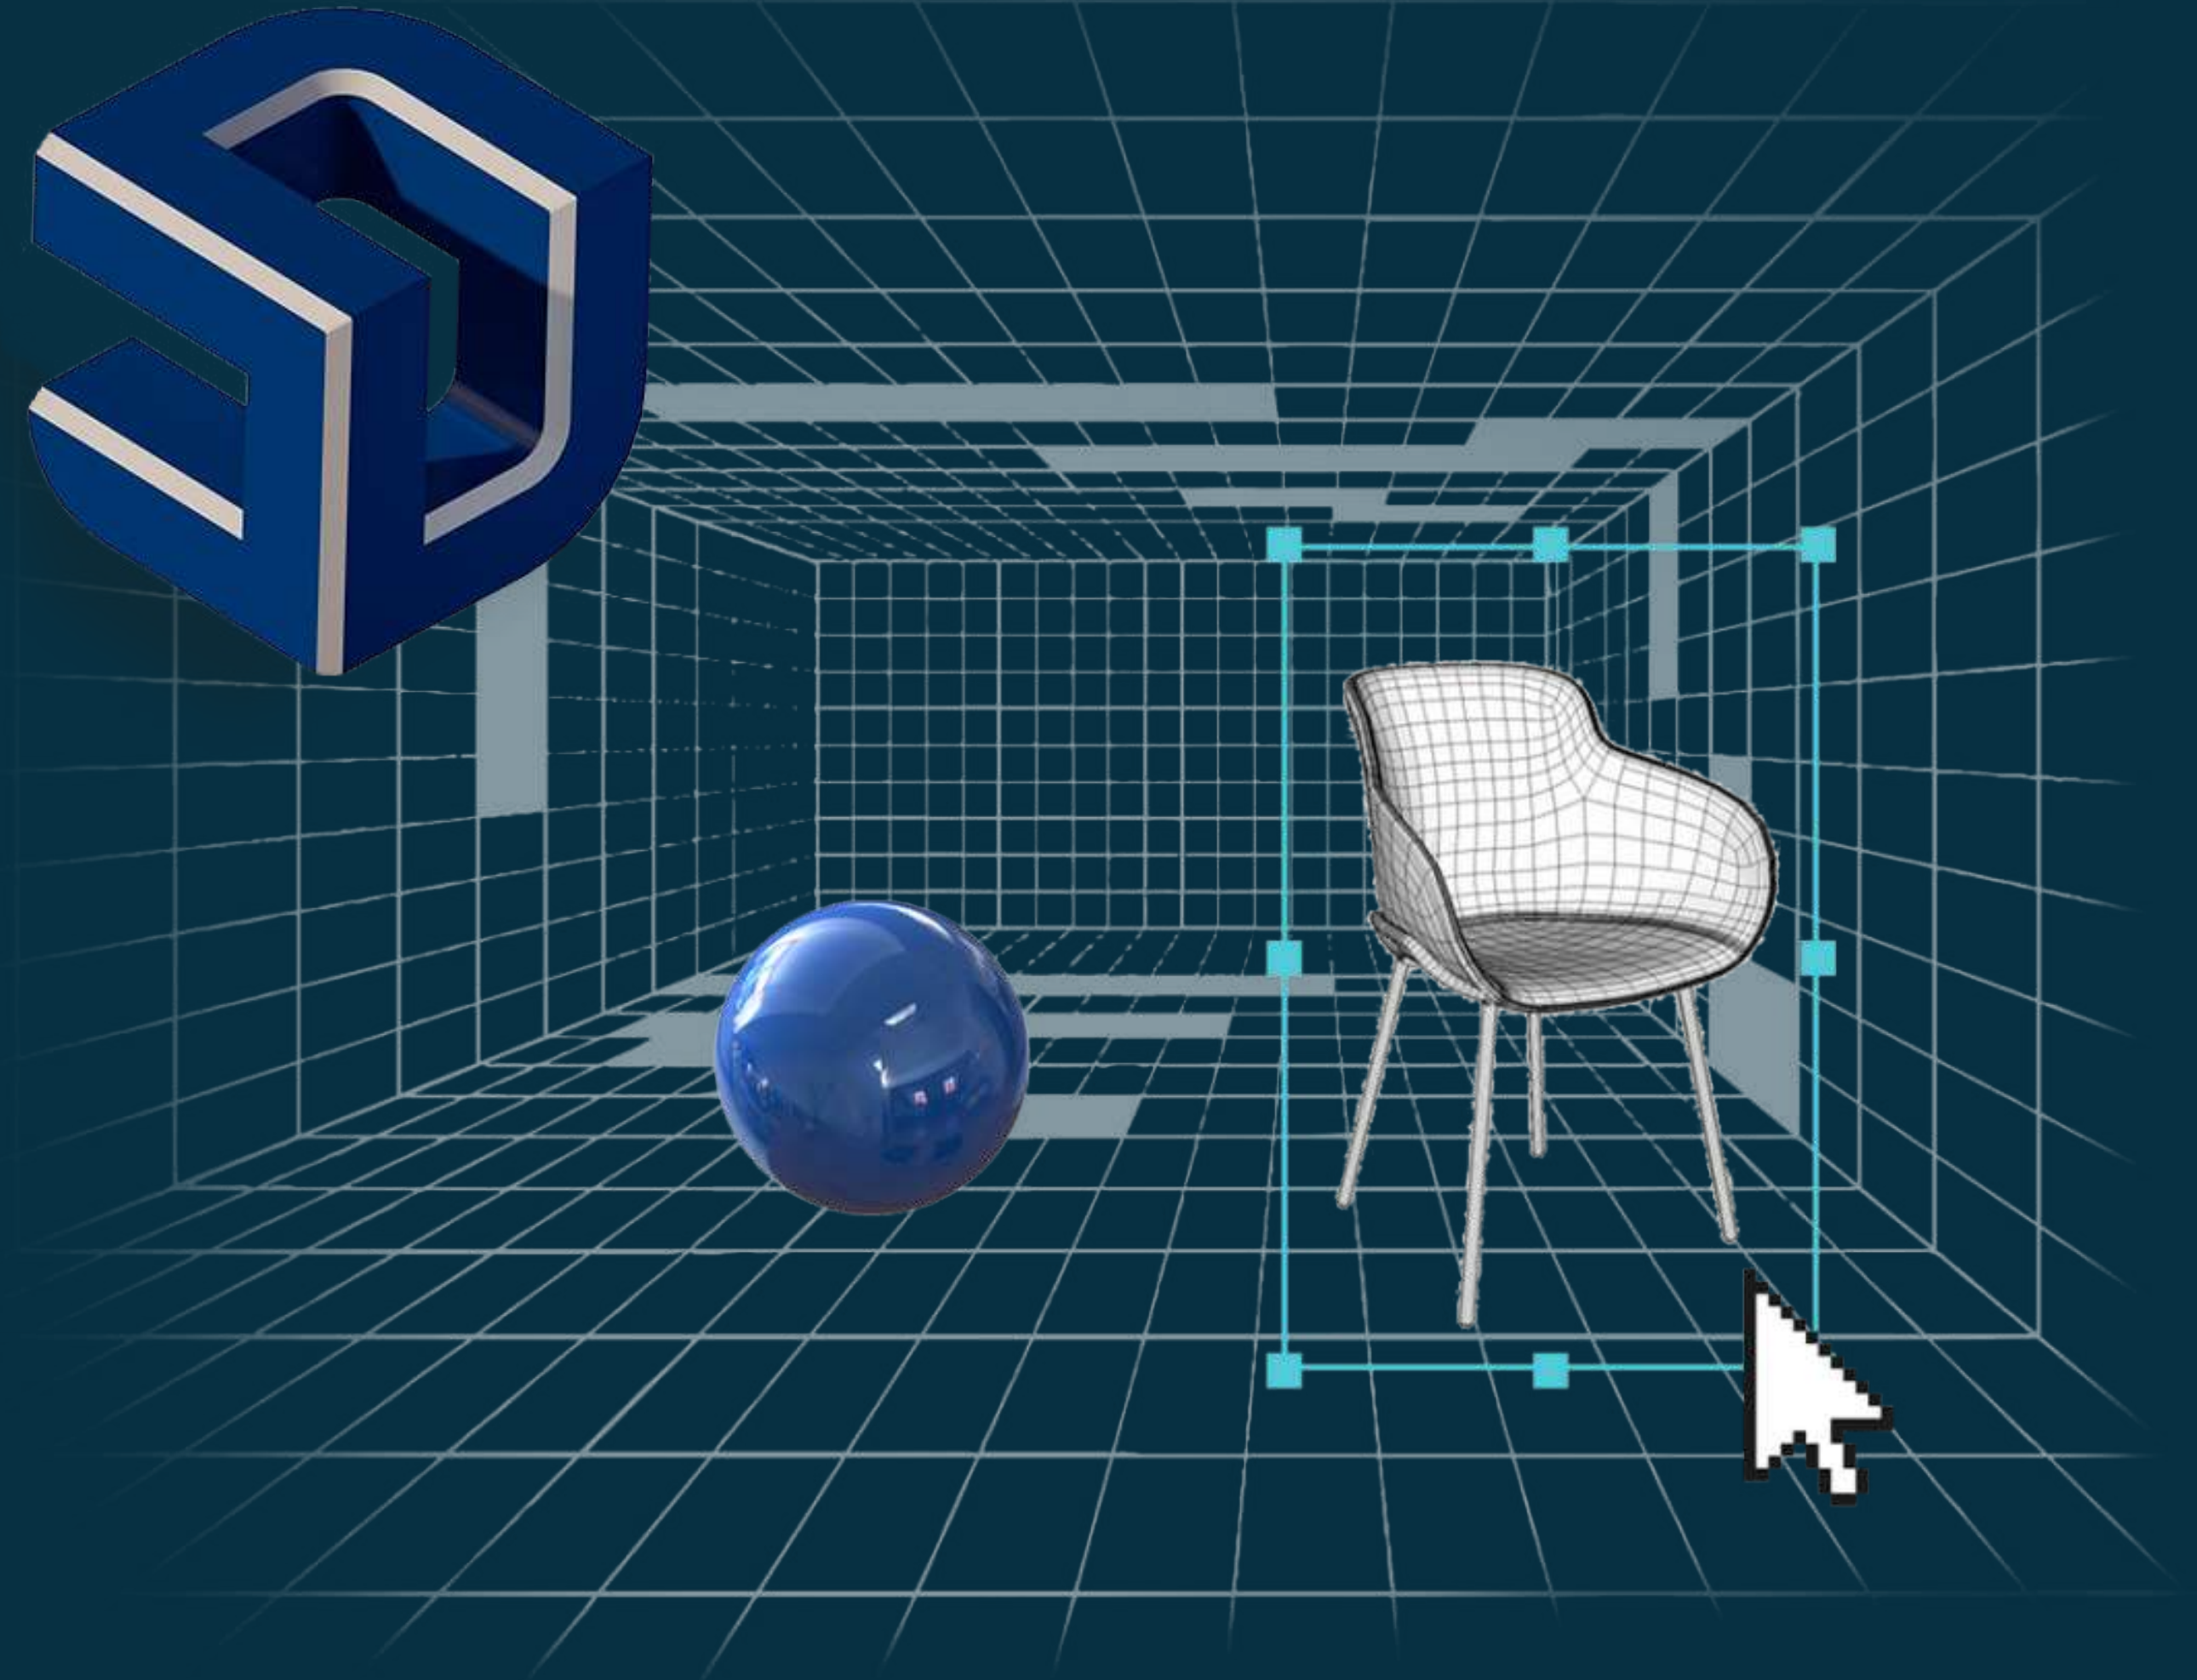

DomuS3D lets you **easily design with modular and parametric furniture systems** through the use of configurable products that follow composition rules set by the manufacturer, making the entire design process even more professional and complete.

# AN “OPEN” SYSTEM FOR YOUR PROJECTS

The software is equipped with an “open” system **that lets you upload your own files** (both tile images and 3D furniture models). You can also access 3D Warehouse (SketchUp) and directly import .skp files into your project.

# PHOTOREALISTIC IMAGES WITH V-RAY INTEGRATION

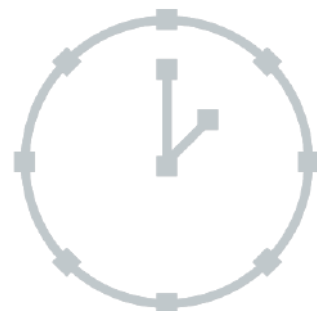

DomuS3D integrates the **V-Ray rendering engine** so users can generate photorealistic HD images in a very short time. Users can just as easily obtain 360° panoramas that can be viewed online or with a 3D Virtual Reality headset, giving their clients a new way to see their designs.

# MANAGE AND OPTIMIZE YOUR RENDERING PROCESSING

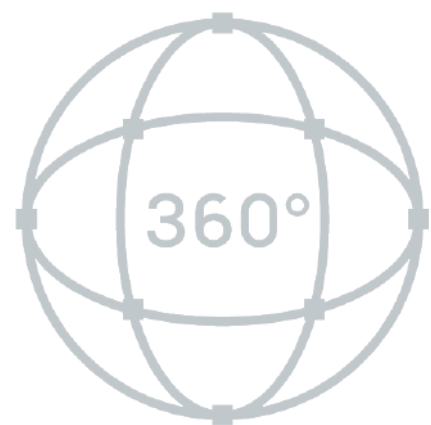

**Render Manager** is a dedicated DomuS3D program that lets you manage the priority and order in which you process your renderings. **With Render Manager, process your rendering images in the background while continuing to work in DomuS3D.**

# DIVE INTO YOUR PROJECTS WITH VIRTUAL REALITY

Present your projects to your clients through a fully immersive virtual 3D experience, incredibly realistic and convincing. With DomuS3D you can create VR images using the V-Ray rendering engine.

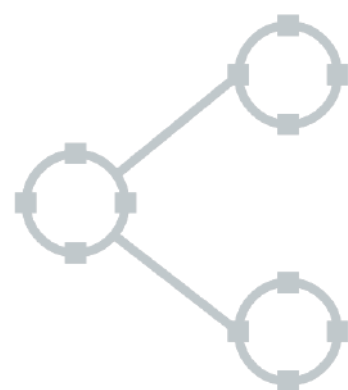

# SHARE YOUR PROJECTS WITH DOMUS3D 360

The Web App designed for you to **share projects, catalogues, PDFs, rendering images, 360° panoramas, and all other content** created with DomuS3D.

With DomuS3D, you have dedicated cloud space to publish projects so they can be viewed and downloaded by your clients and colleagues using DomuS3D 360 online.

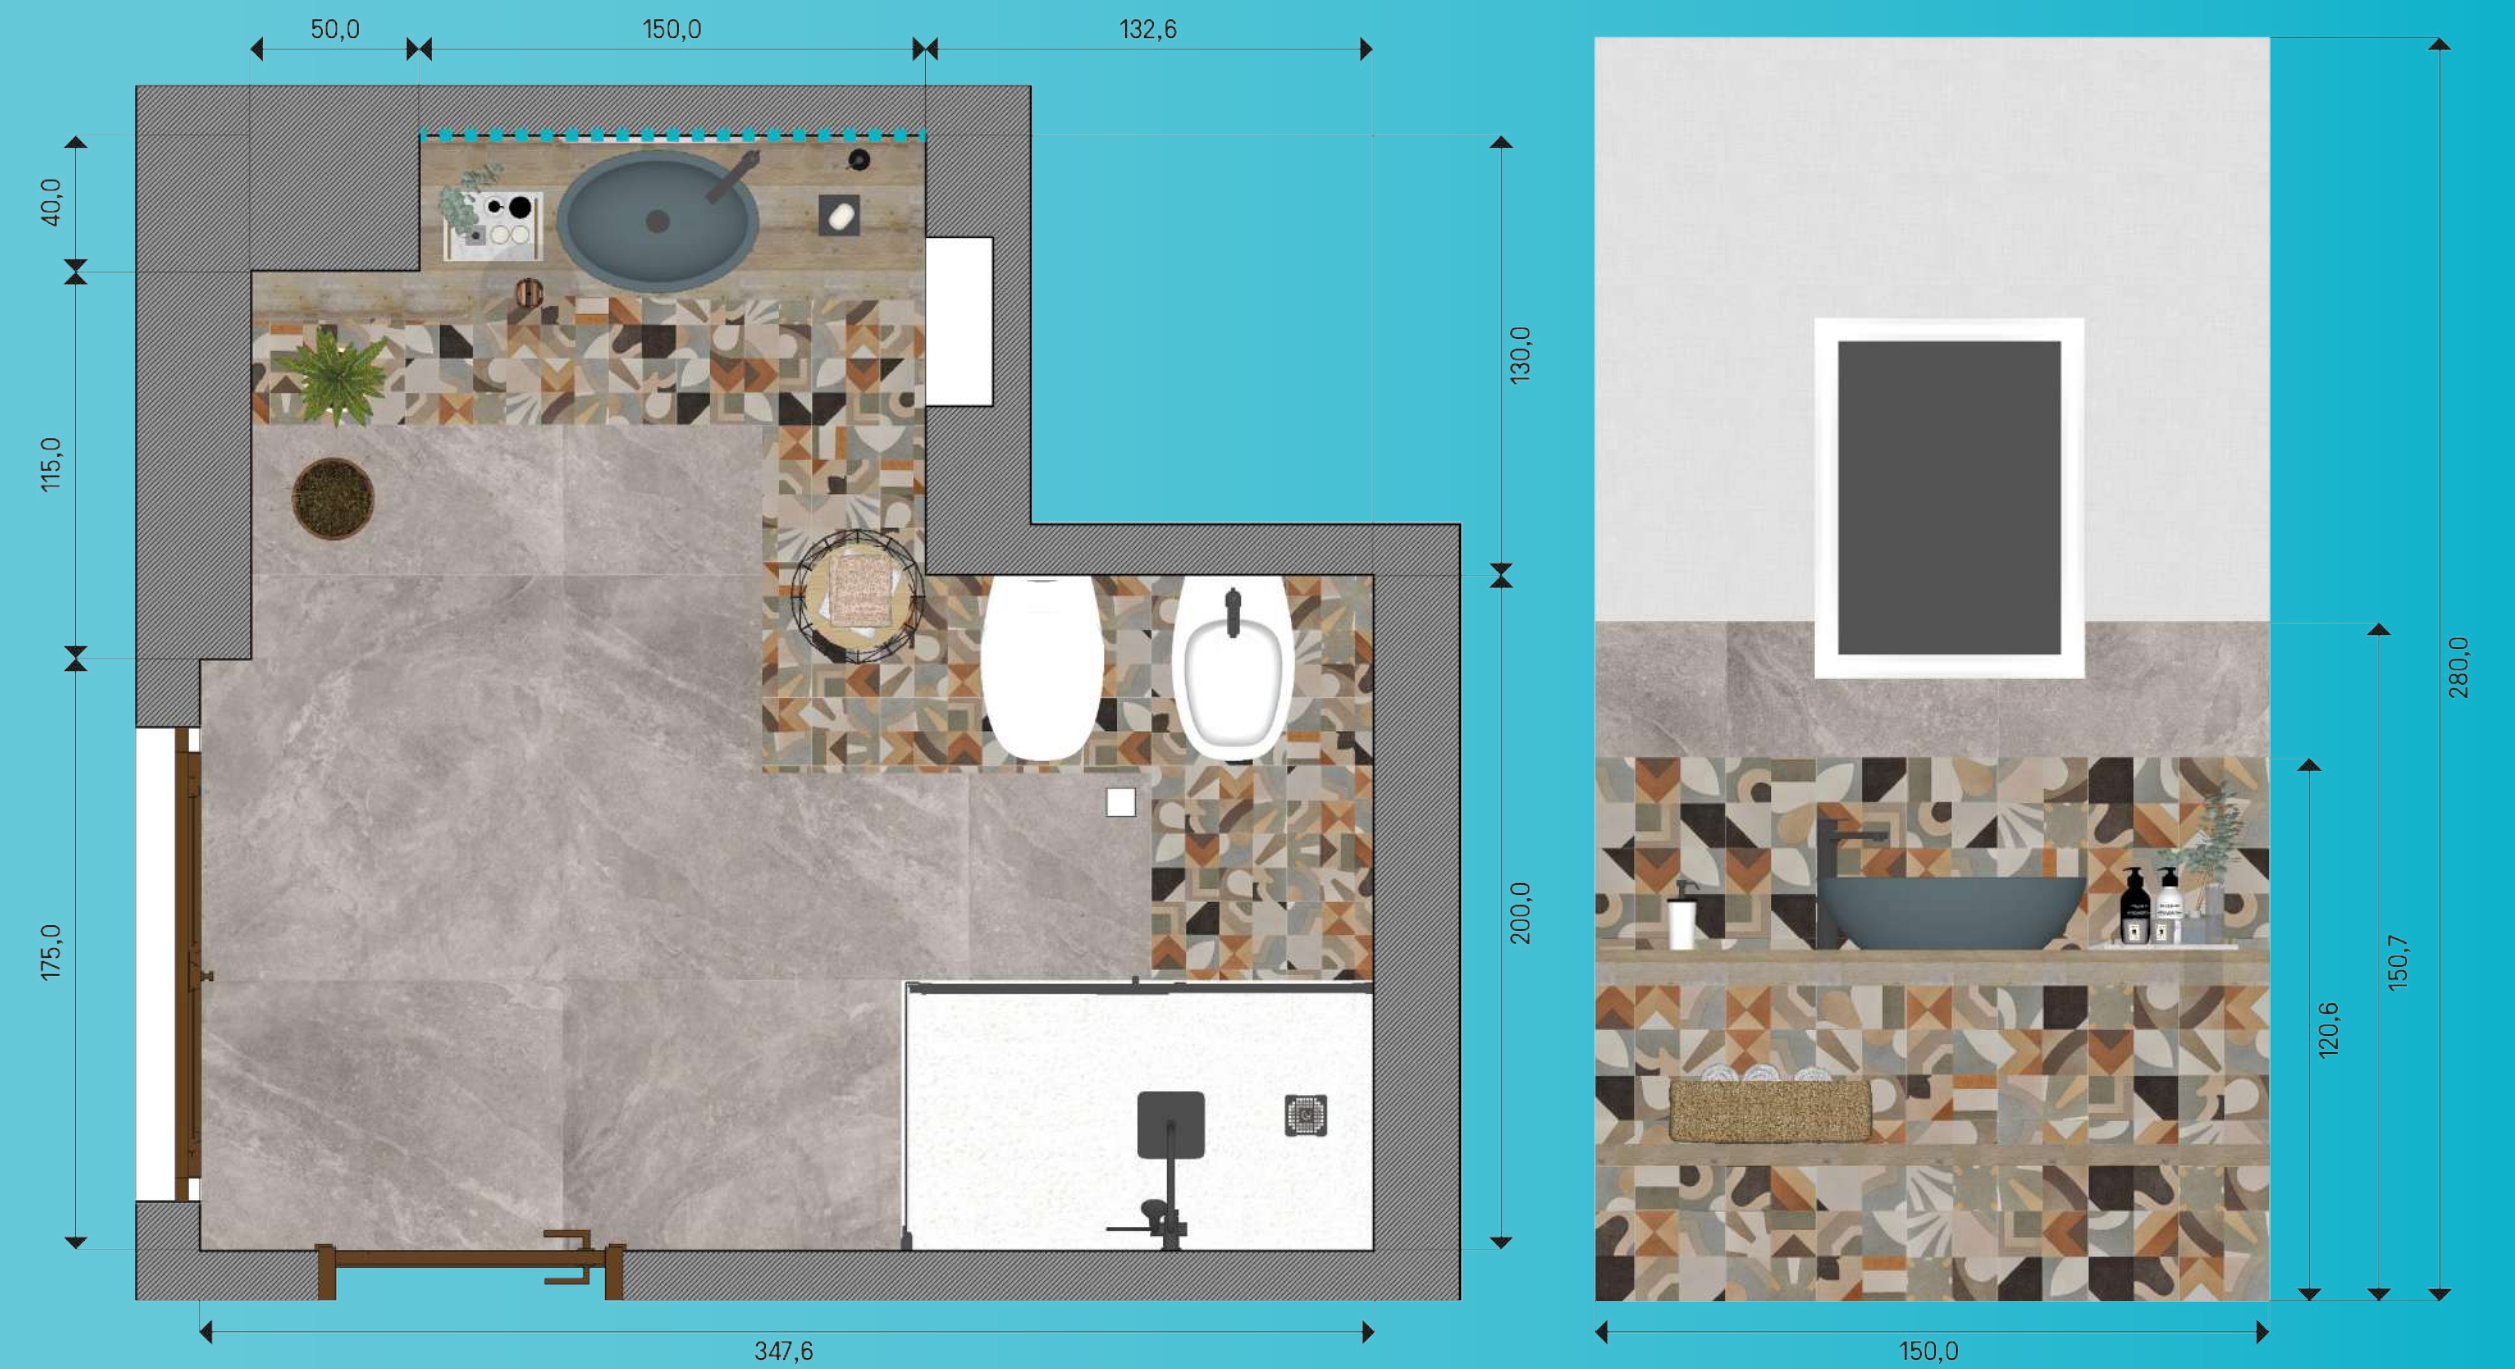

# ESTIMATES AND TECHNICAL PRINTS

With DomuS3D, you can create **detailed technical prints** of plans and elevations and calculate the amount of material used. Material calculations let you manage waste percentage for tile installations, as well.

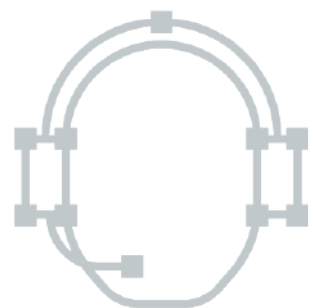

DomuS3D includes a dedicated module, **DomuS3D Composer**, that lets you easily create brochures and project summaries to present to your clients.

# TECHNICAL SUPPORT & ASSISTANCE

We offer remote **tech support and assistance** to help **guide our clients** through our software, from installation to the final project.
