

**YOUR HOME LIKE
YOU'VE NEVER SEEN BEFORE**
Transform the space around you by changing the floors and walls of
any photo.

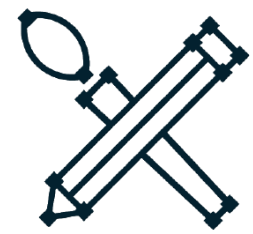

REALITYREMOD

by MATICAD

RealityRemod is the innovative Augmented Reality Web App that swaps out the flooring and walls of any photograph, letting you preview colors and explore new design alternatives for any room.

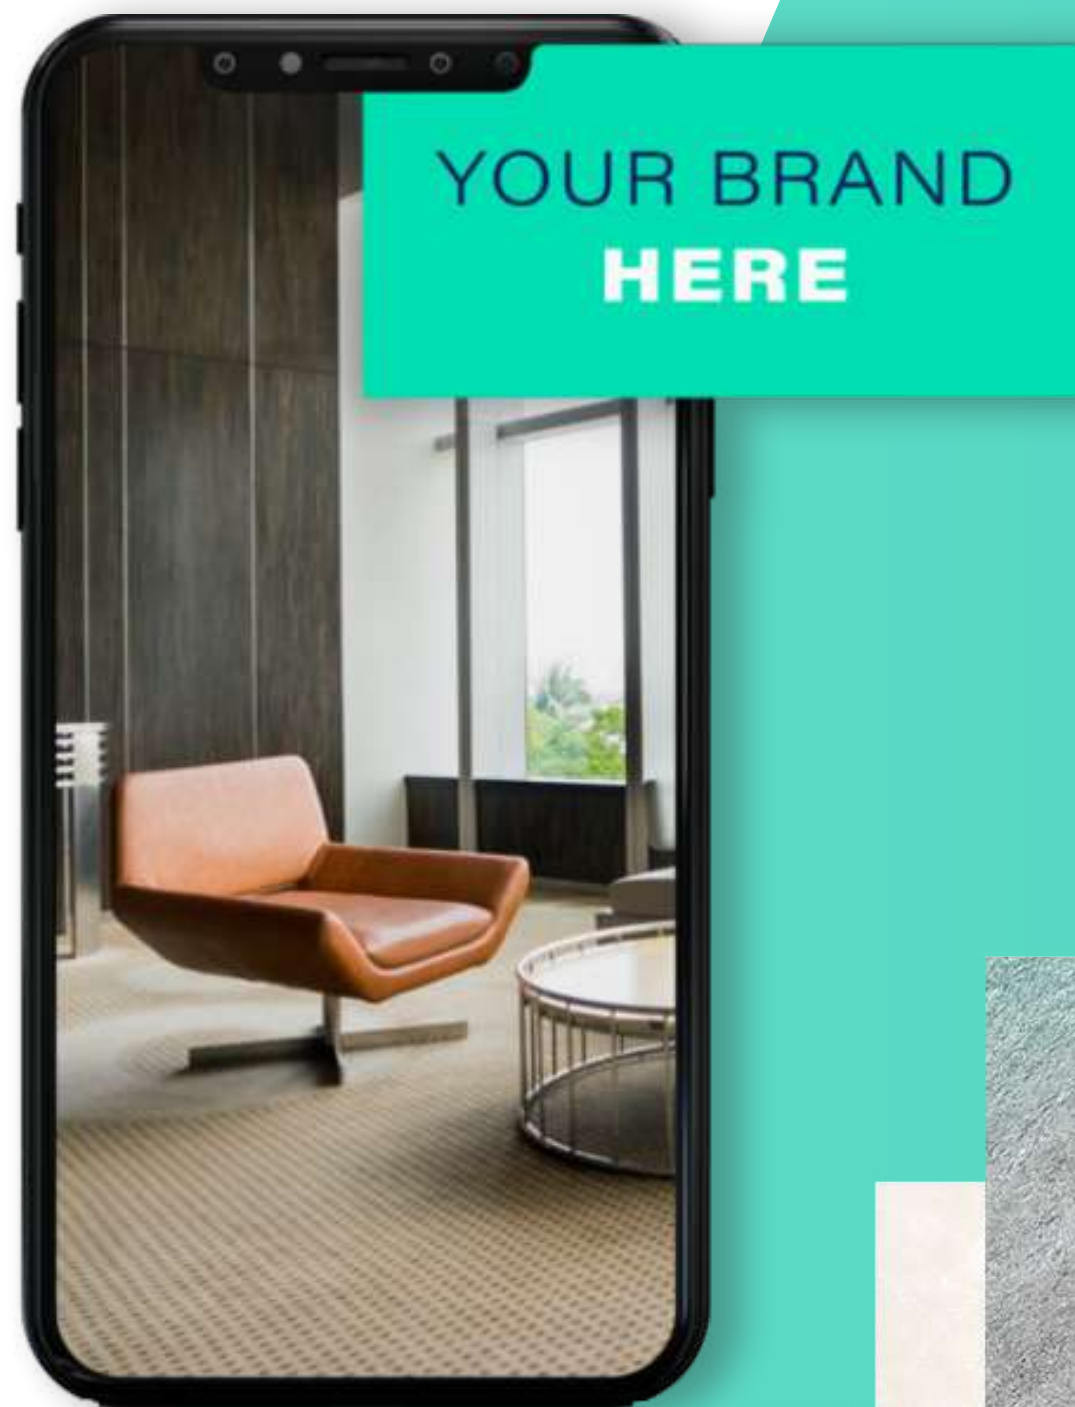

VISUALIZE YOUR PRODUCTS
REALISTICALLY IN ANY ROOM.

CUSTOMIZED AND BRANDED USER
INTERFACE FOR YOUR COMPANY.

EXPAND YOUR DIGITAL PRESENCE
AND ENGAGE POTENTIAL
CUSTOMERS DIRECTLY FROM
HOME.

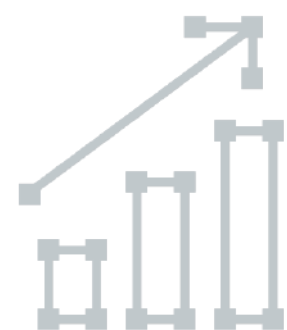

AN INNOVATIVE TOOL TO DEVELOP YOUR BUSINESS

RealityRemod is an efficient marketing tool that can be integrated on your website, expanding your digital presence and giving you the opportunity to **attract and engage potential customers on the web.**

Let users dream up their new home with just a click, applying your products directly to their rooms and previewing multiple design solutions in real-time.

FEATURES

- Integrated on your website
- High quality product library
- Artificial Intelligence for surfaces
- Interactive lighting
- Integration with TileInspector
- Laying pattern selection
- Change grout size and color
- Adjust tiling position
- Comparison tool
- Project summary PDF
- Detailed product information
- Project sharing

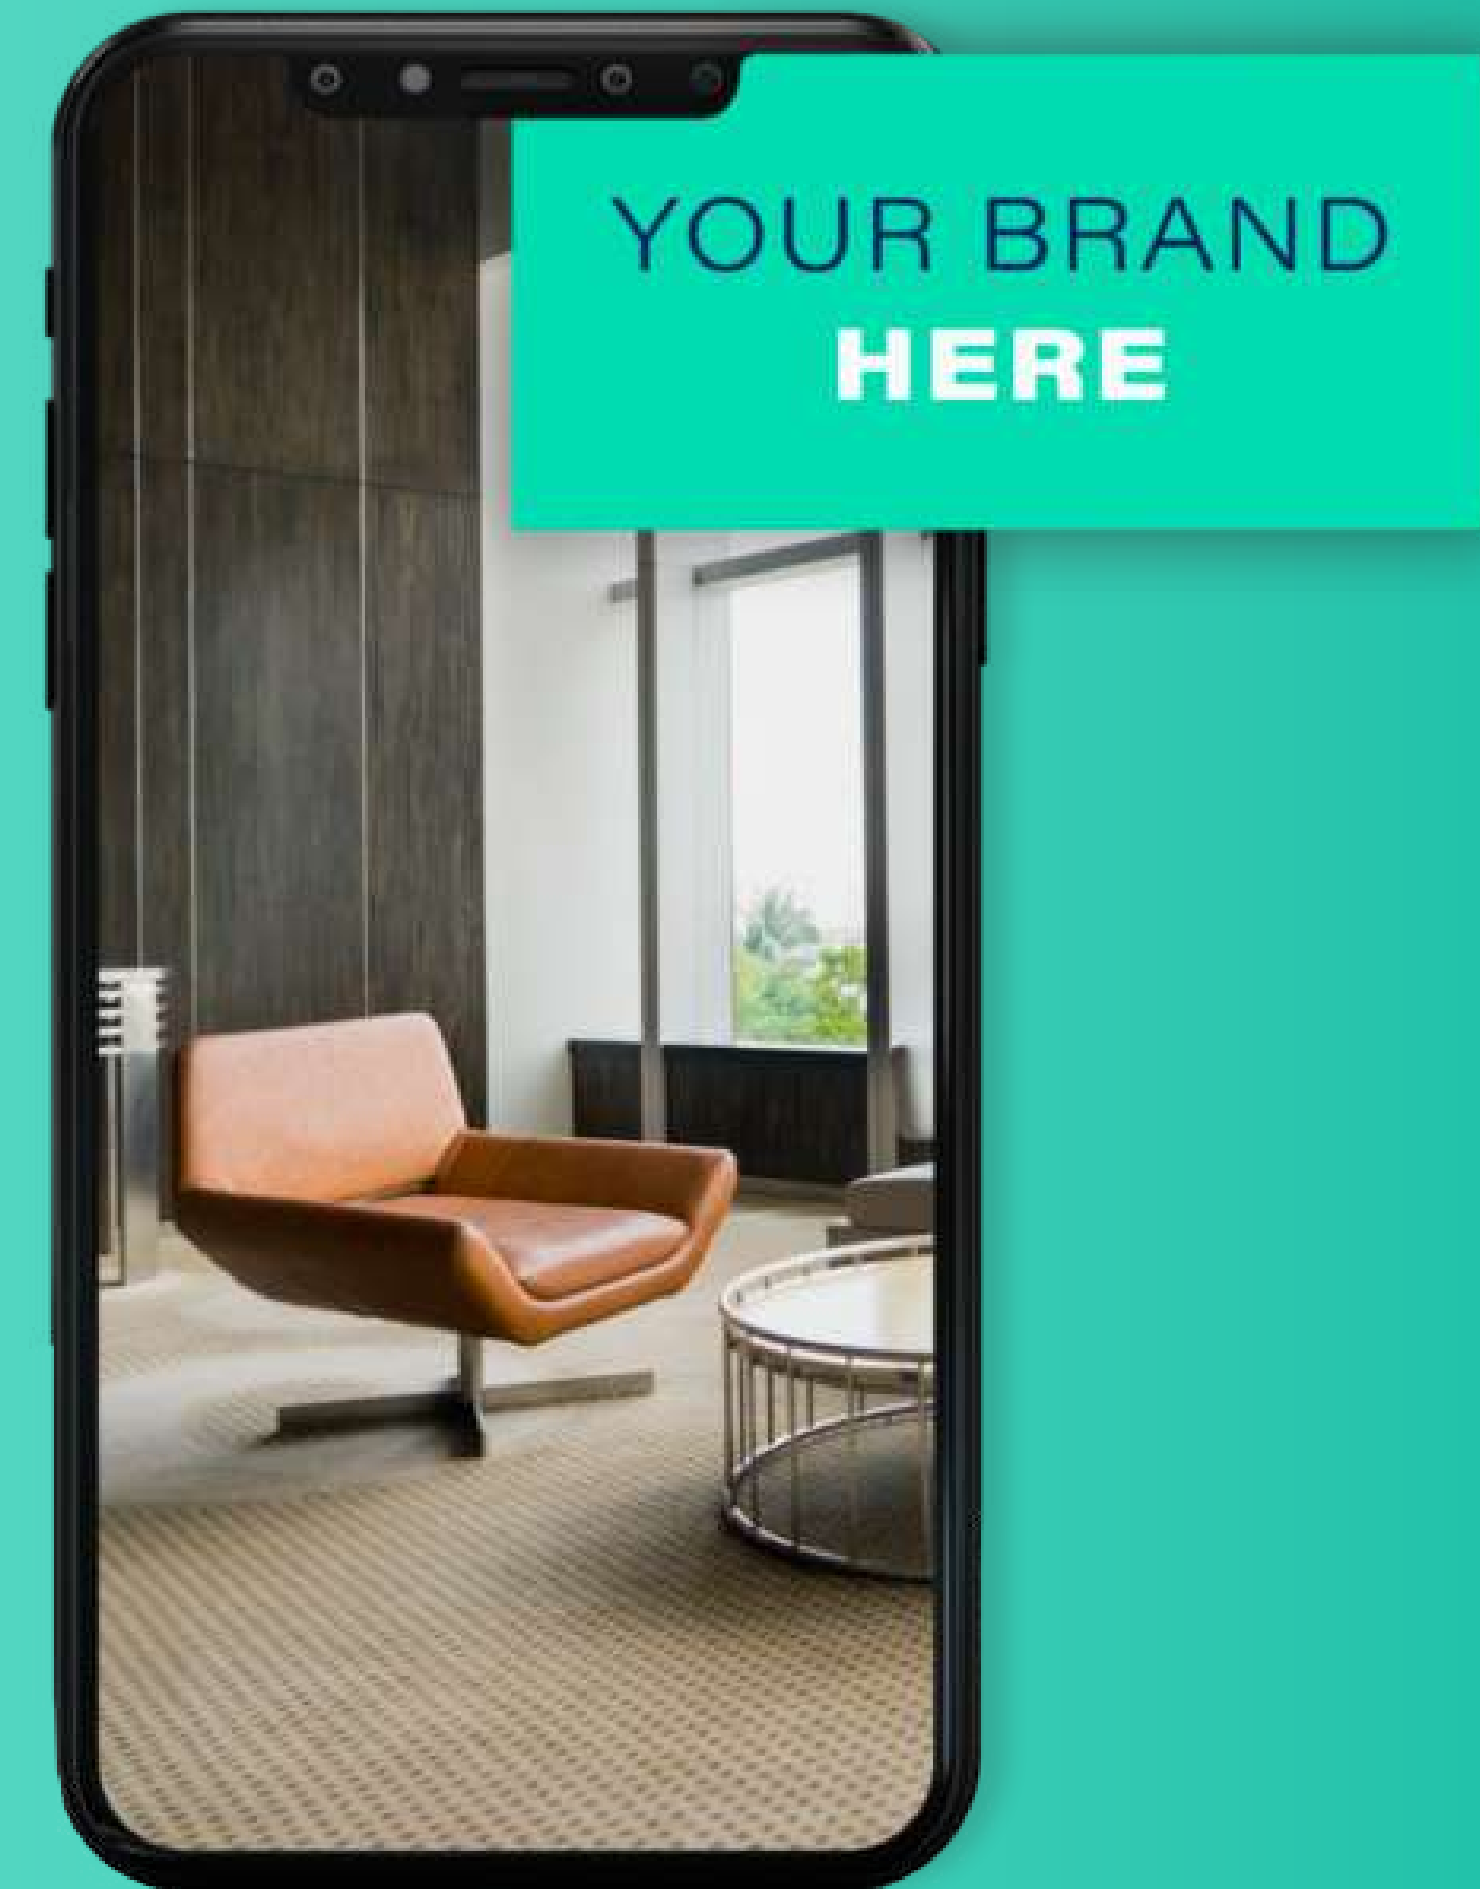

INTEGRATED ON YOUR WEBSITE

RealityRemod can be integrated on your company website and is accessible from any browser on any device, no installation necessary. Two types of integration available:

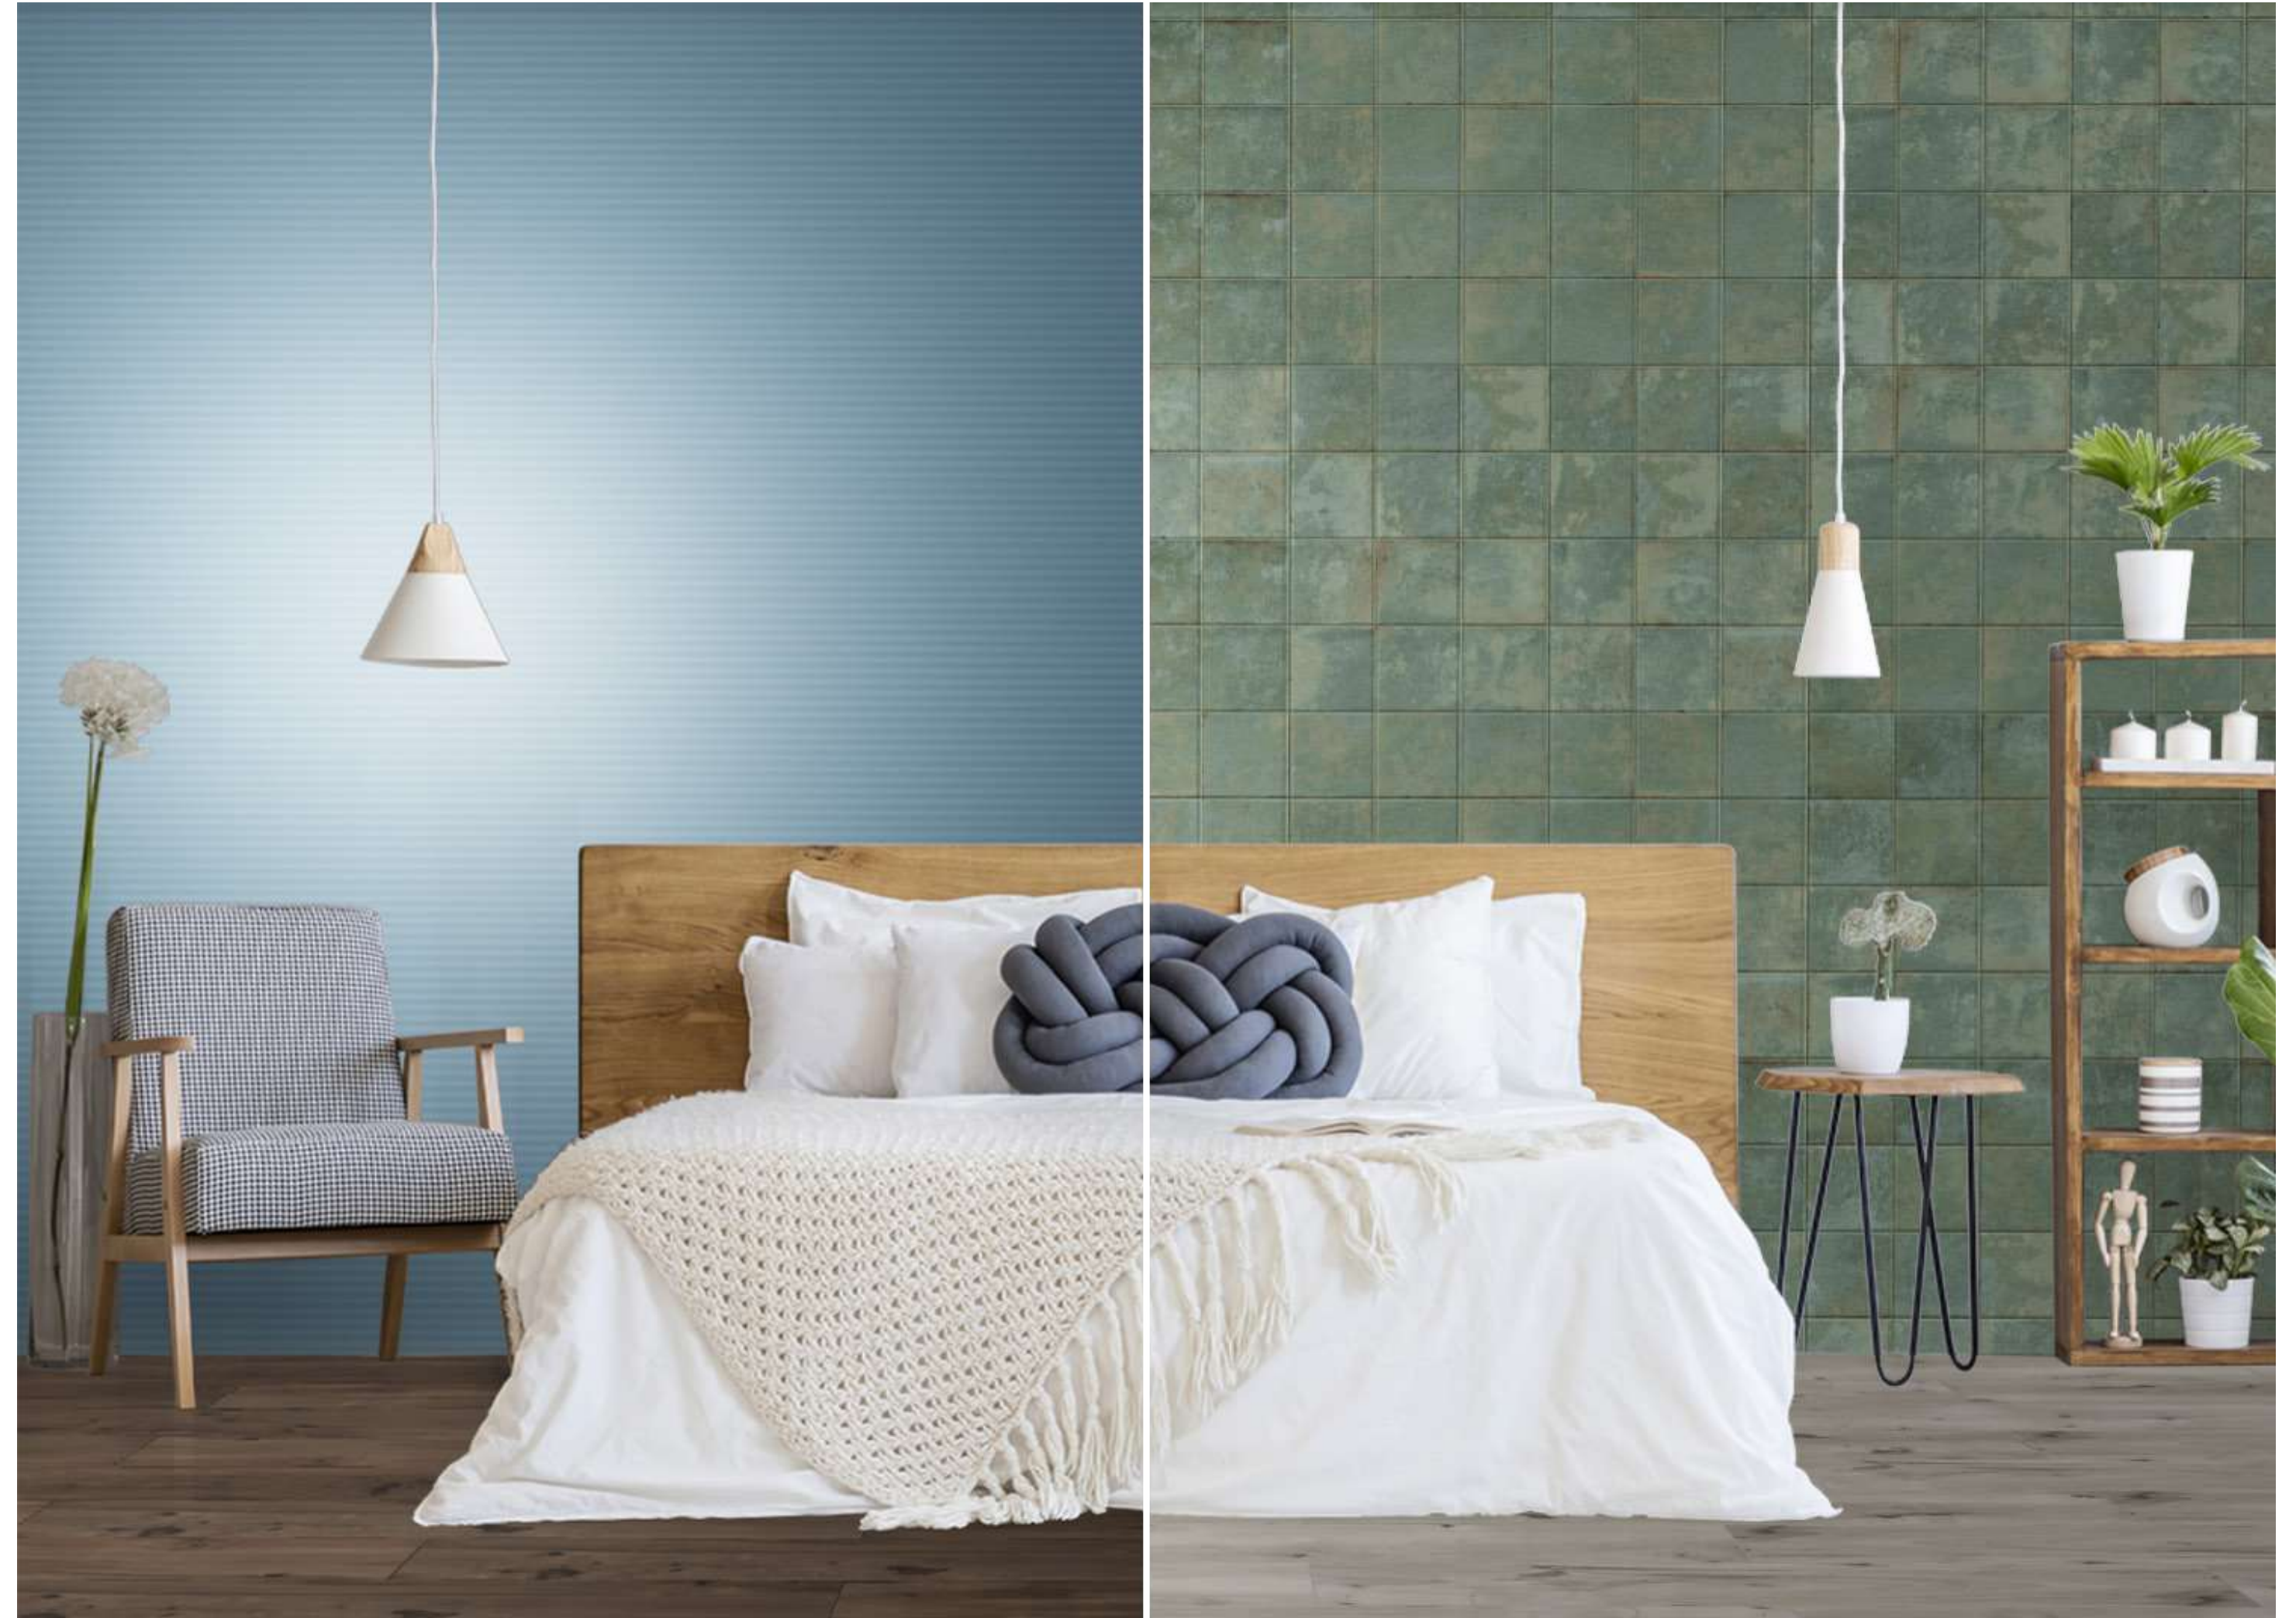

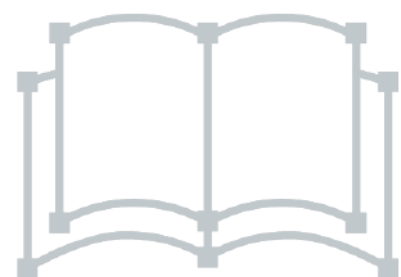

- **TOP'N GO INTEGRATION:** quickest and easiest type of integration, which allows RealityRemod to be hosted within a dedicated company webpage.
- **TOTAL INTEGRATION:** more flexible option with possibility to customize user interface of the tool. Product database and analytics available on company website. Publication of products to the Web App can be managed independently. This type of integration allows for connection to e-commerce platform.

HIGH QUALITY PRODUCT LIBRARY

The product library available in RealityRemod is curated to the smallest detail to guarantee the highest level of realism possible for your 3D projects.

POWERED BY ARTIFICIAL INTELLIGENCE

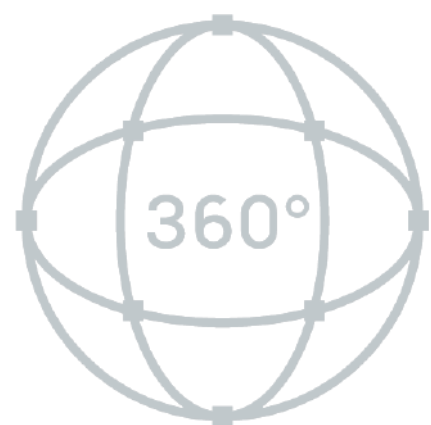

RealityRemod harnesses the power of **Artificial Intelligence** to automatically recognize the floors and walls in any photograph, so users can apply any new material they want with just one click.

INTERACTIVE LIGHTING

Examine the **surface finishing** of virtual products by activating an **interactive light source** that moves around the scene, giving projects an even more realistic feel.

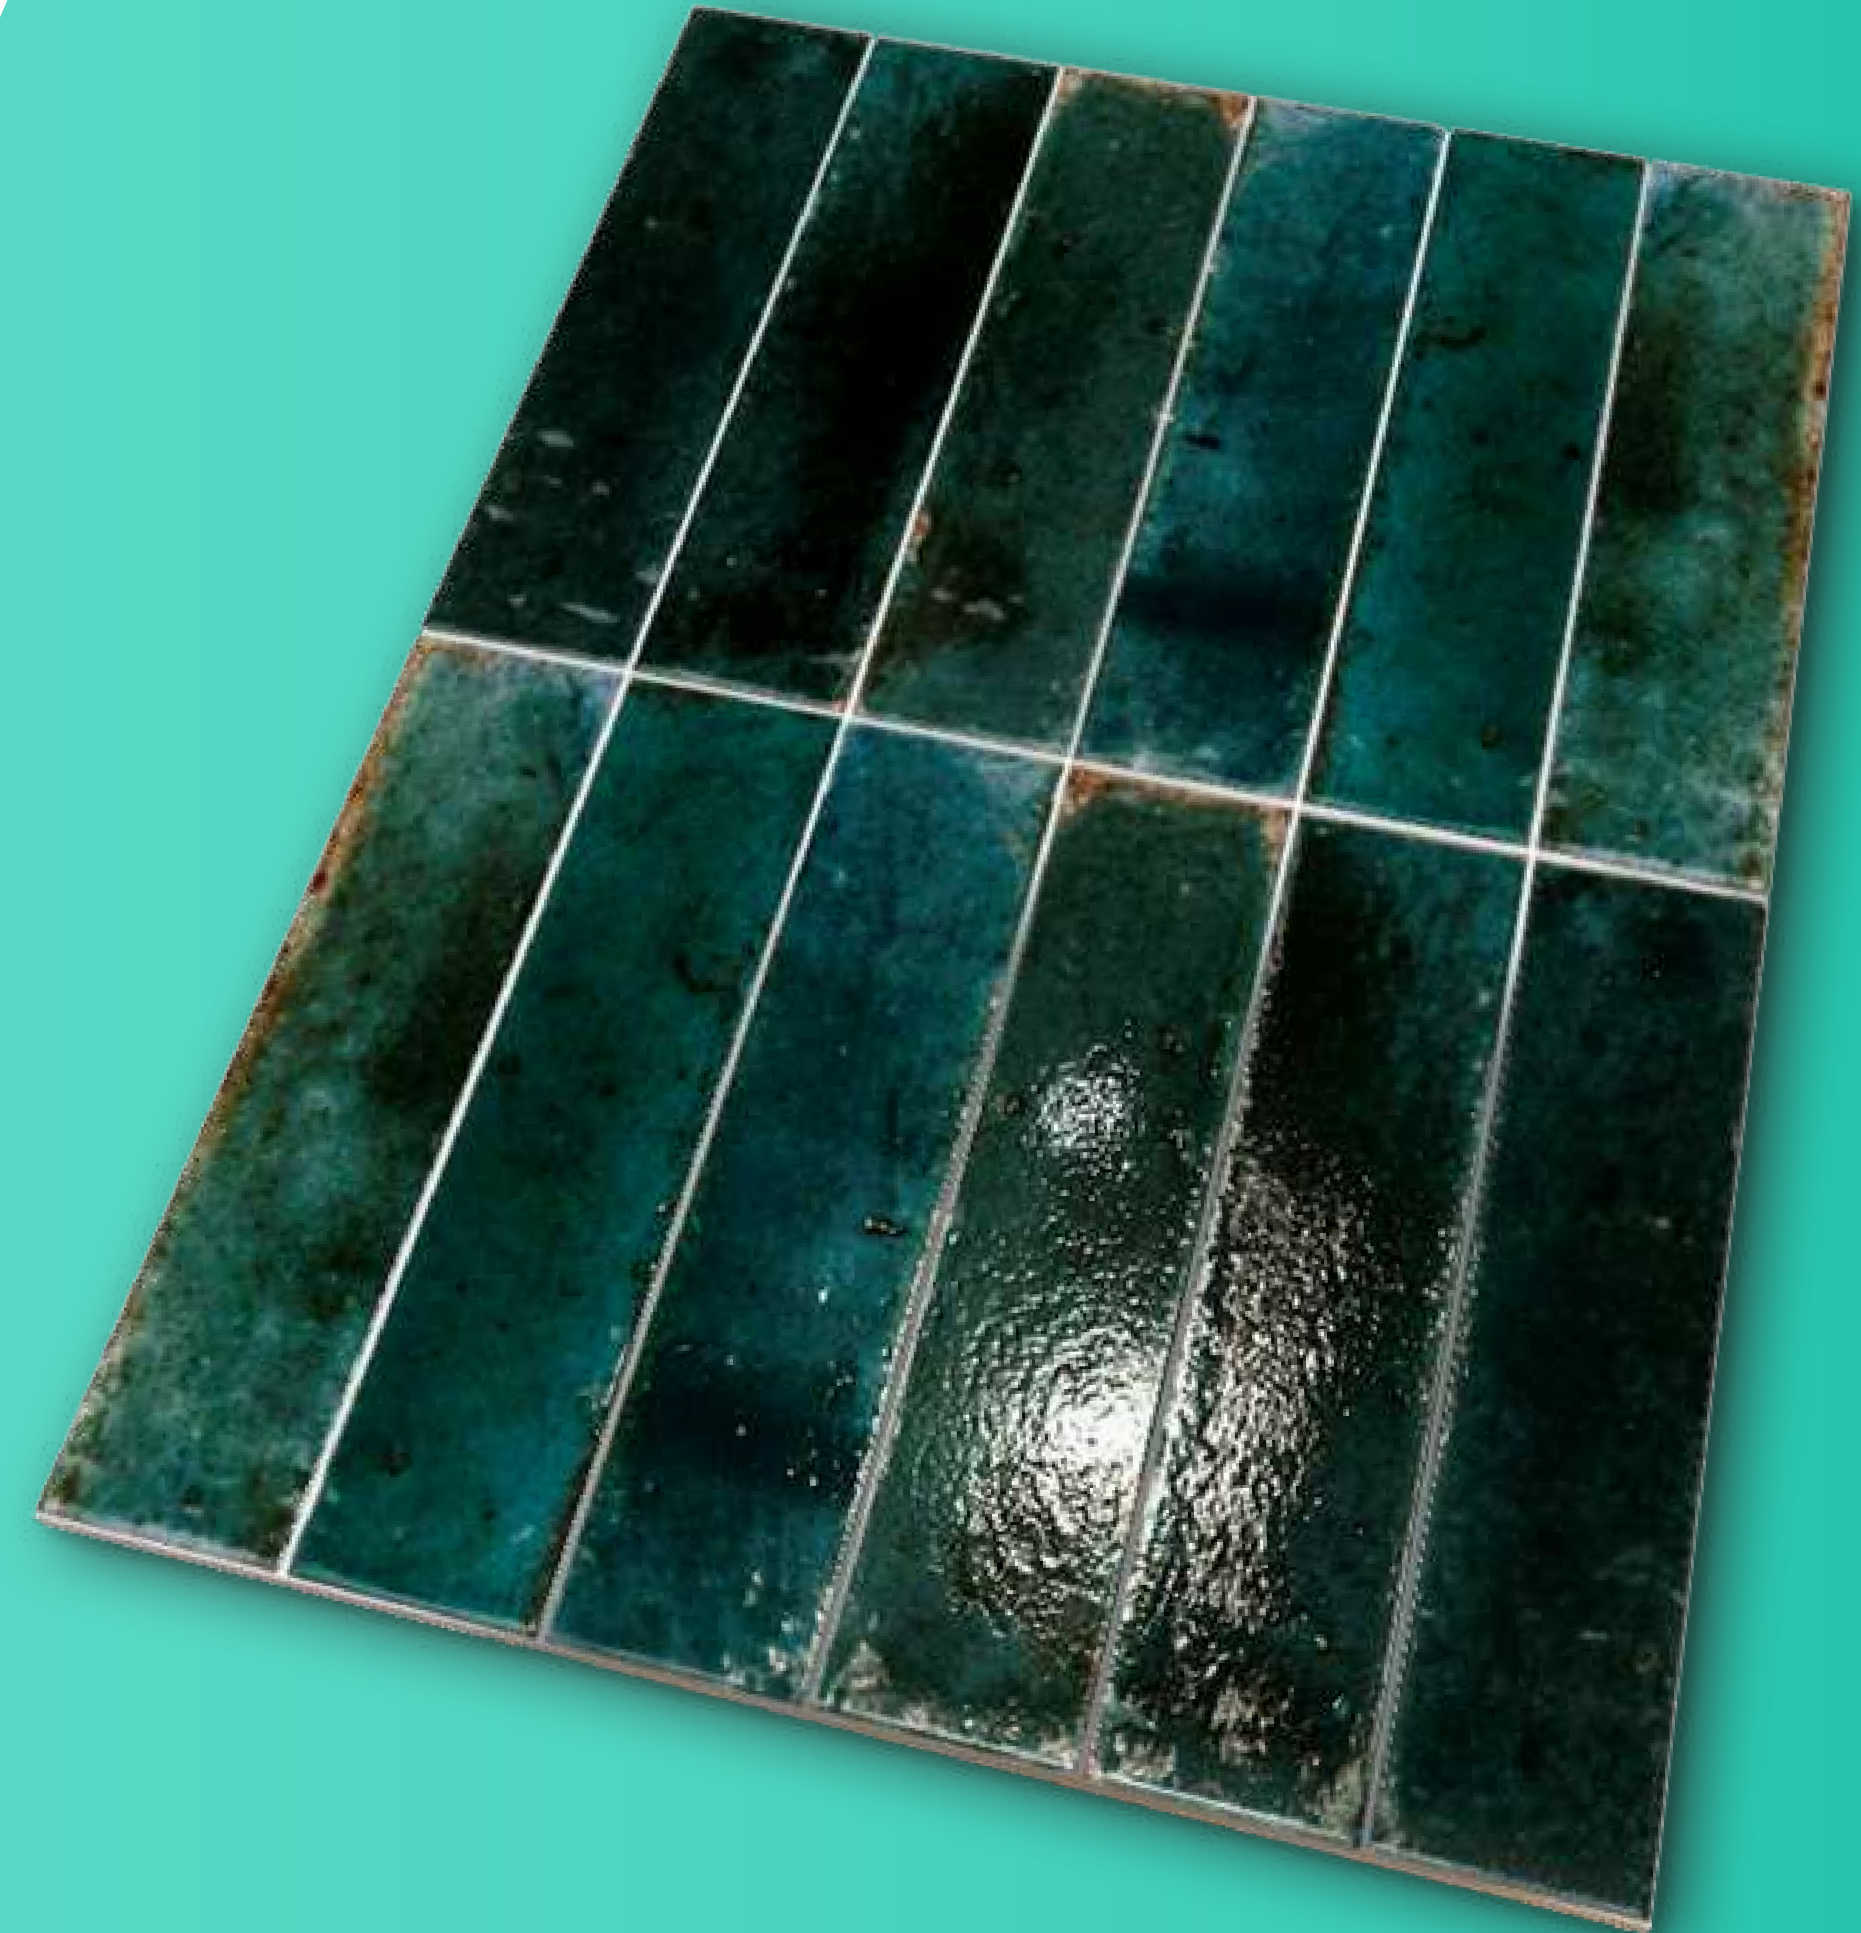

TILEINSPECTOR INTEGRATION

RealityRemod can integrate an optional online module, **TileInspector**, through which users can **visualize a detailed high-quality 3D digital recreation of the selected product**. With TileInspector, users are able to explore every detail of a product, examining its material properties while getting a better understanding of the almost tangible 3D size of the tile.

AVAILABLE LAYING PATTERNS

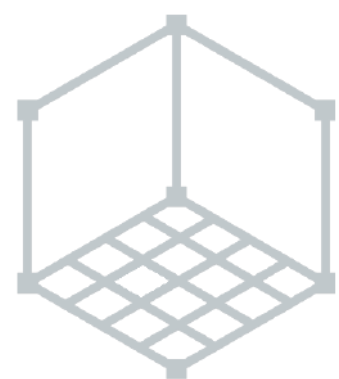

Among the optimized features offered in RealityRemod is the ability to select from a wide range of **automatic laying patterns**, which let users quickly simulate professional installations in just one click.

CHANGE GROUT SIZE AND COLOR

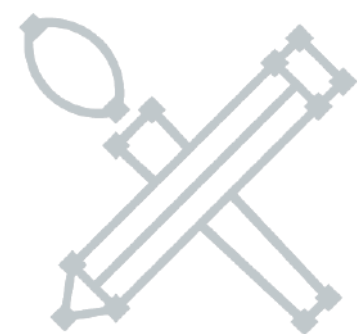

With RealityRemod, users have the ability to quickly change grout size and color.

ADJUST TILING POSITION

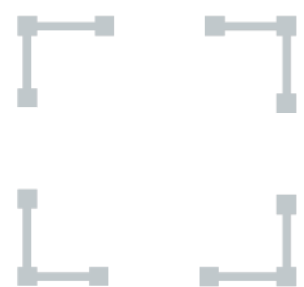

Once a new material has been applied to the floor or wall, users can adjust the position of grout lines by dragging tiles in the desired direction.

VIEW MULTIPLE MATERIALS WITH COMPARISON TOOL

For users that are still deciding between two different products, the **Comparison Tool** lets them view **both products applied to the scene**, one next to the other. By dragging a central slider, the user can slide between the two scenes and compare the two materials in detail.

PROJECT SUMMARY PDF

Once a project has been completed, users can generate a **project summary** containing the final room scene and the details of the material applied to the scene. **Save it** and share it as a PDF or simply print it out.
