

Dune

Following the Only clays, no glaze philosophy, we use only natural clays to guide the deposition of colored earths, just as the wind moves, overlaps, and transforms sand into dunes. Dune evokes the sinuous shapes created by sand, with ever-changing curves and ridges made possible by technology, making each piece unique. It's a constantly evolving landscape, made from pure material, free of glazes or artificial graphics. Dune is an invitation to walk barefoot, following the wind, recalling familiar beaches around the world.
