Il nuovo brand **Capri** è la soluzione accessibile a tutti, con gli stessi vantaggi della Compactline e la qualità Made in Italy, ma più versatile grazie alla monofase e di dimensioni ridotte per il trasporto e l'utilizzo. I due modelli e , **macchina da taglio** e **macchina da profilatura**, sono un'ottima soluzione per gli show-room, i laboratori, i cantieri edili e le rivendite di ceramiche, marmo, pietre naturali e materiale edile che vogliono produrre pezzi speciali, velocemente e con un piccolo investimento.

La nueva marca **Capri** es la solución al alcance de todos, con las mismas ventajas que la Compactline y la calidad Made in Italy, pero más versátil gracias a la monofásica y al reducido tamaño para el transporte y el uso. Los dos modelos, **CapriCut** y **CapriBull**, una **cortadora** y una **perfiladora**, son una excelente solución para salas de exposición, laboratorios, obras y reventas de cerámica, mármol, piedras naturales y materiales de construcción que quieren producir piezas especiales, rápidamente y con una pequeña inversión.

The new **Capri** brand is the solution accessible to everyone, with all the advantages from Compactline equipment and Made in Italy quality, but more versatile thanks to single-phase power and smaller size for transport and use. The two models, **CapriCut** and **CapriBull**, respectively **cutting** and **profiling** machines, are excellent solutions for showrooms, workshops, construction sites and ceramics- marble-natural stones and building materials dealers who want to produce special pieces, quickly and with a small investment.

La nouvelle marque **Capri** est la solution accessible à tous, avec les mêmes avantages que la qualité Compactline et Made in Italy, mais plus polyvalente grâce au monophasé et à la petite taille pour le transport et l'utilisation. Les deux modèles, **CapriCut** et **CapriBull**, une **machine à découper** et une **machine à profiler**, sont une excellente solution pour les showrooms, les laboratoires, les chantiers et les reventas de céramique, marbre, pierres naturelles et matériaux de construction qui souhaitent produire des pièces spéciales, rapidement et avec un petit investissement.
