

An exploded view diagram of a mechanical assembly, showing various components like a top plate, a central ring, a large gear-like base, and a bottom housing. The components are arranged vertically, showing their relative positions and how they fit together. The entire assembly is rendered in a dark, metallic grey color with white outlines for internal features.

MADE IN ITALY

MiniPro & BalancePro

UNA GAMMA COMPLETA DA 25 A 1025 MM

A COMPLETE RANGE FROM 25 TO 1025 MM

MiniPro è ideale per altezze da 25 a 50 mm, mentre BalancePro copre un'escursione più ampia, raggiungendo i 1025 mm. Entrambi i supporti permettono di regolare automaticamente la pendenza fino al 5% o bloccare la testa per una maggiore stabilità, la regolazione dall'alto e dalla base e sono dotati del sistema QuickOn, una nuova aletta progettata per semplificare la posa di piastrelle in ceramica, lastre in pietra e listoni in decking, rendendo l'installazione più rapida, precisa e sicura. Con MiniPro e BalancePro, hai sempre una soluzione versatile, affidabile e performante, ideale per qualsiasi progetto di posa sopraelevata.

MiniPro is ideal for heights from 25 to 50 mm, while BalancePro covers a wider range, reaching up to 1025 mm. Both supports allow for automatic slope adjustment of up to 5% or head locking for greater stability. They also feature top and base adjustment and are equipped with the QuickOn system, a new tab designed to simplify the installation of ceramic tiles, stone slabs, and decking boards, making the process faster, more precise, and safer. With MiniPro and BalancePro, you always have a versatile, reliable, and high-performance solution, perfect for any raised flooring project.

PRIMEUP 10 - 25 MM

PrimeUp è un supporto regolabile da 10 a 25 mm, con un'escursione totale di 15 mm grazie al meccanismo di regolazione e due prolunghe.

PrimeUp is an adjustable support ranging from 10 to 25 mm, with a total travel of 15 mm thanks to the adjustment mechanism and two extensions.
