AQUAELITE

COMPANY

AQUAELITE is an Italian company focused on designing and manufacturing elegant and innovative shower systems. A wide range of products with a unique style, perfect synthesis of research studies, first quality materials, technological investments and, above all, 40 years of professional competence and experience hand down from father to son.

DESIGN

Not just functional and reliable products. Our creations are the result of aesthetics reflection and strong personal passion. Not just technical solutions. First we translate our concept of “exclusive shower experience” into a pencil stroke and then we give it shape and meaning.

MATERIALS

Noble and recyclable materials like stainless steel. Brass and plastic processing according to efficient production to reduce waste. Careful selection of raw materials in line with the strictest international certifications. Evidence of our commitment to respect the environment.

TECHNOLOGY

Our qualified staff, the use of modern equipment and advanced technologies make each single item a perfect mix of precision and aesthetic perfection, allowing us, at the same time to maintain the required production flexibility to satisfy any market needs.

MADE IN ITALY

AQUAELITE has deep roots in his country. We are Italian, our raw materials and our unique sense of design are Italian. Above all Italian are our wealth of experience and our cultural inheritance which are reflected in each product leaves our plant.

TAILOR MADE

Make a wish: our designers will convert your intuitions and projects into concrete solutions that will best suits your needs. Lets make the shower your own space, “TAILOR MADE”, your personal retreat where you can escape the daily stress.

Pianelle Resort in Matera: stones and memories of the past

In the heart of the evocative landscape of the Sassi of Matera stands the Pianelle Resort. A hotel with elegant atmospheres, warm environments and personalized attention. Location of relaxing and cultural stays. The renovation of private bathrooms in the rooms and suites required the installation of products in line with the environment.

The design of the rooms, partly built, partly carved out of tuff, is minimal and understated, in symbiosis with the suggestion of the context. This was the origin of the decision to use products from the **Minimal** collection, with the SF081 A wall-mounted shower head in PVD brushed black metal finish, and **Metal 316** collection with the CL028 E and CL031 E shower columns.

These have been customized and custom-made in PVD brushed black metal finish specifically for the project. With the addition of shower sets and body jets, the result is the full expression of an elegant, refined, innovative and practical bathroom environment.

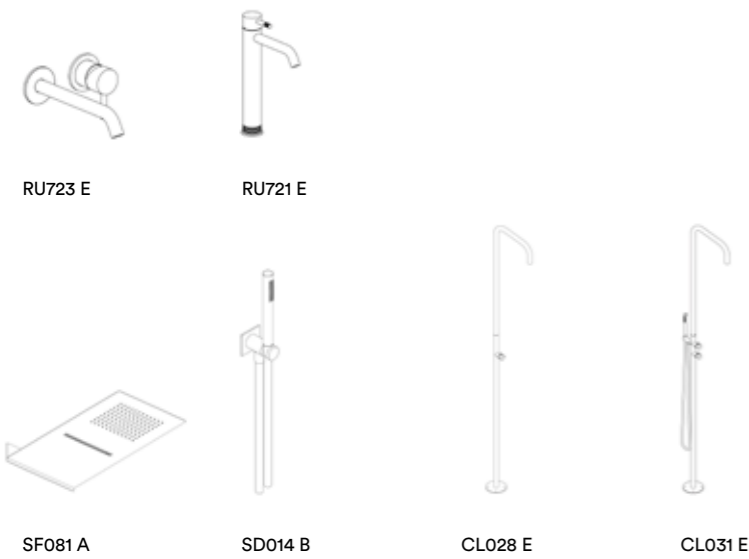

In the suites, protagonists are aroma therapy, color therapy, and water mist, rain, and waterfall jets to instill unique and inimitable feelings of relaxation.

AK Chalet “Alpine Luxury Experience” in Livigno

Immerse yourself in the mountain atmosphere of Livigno. AK Chalet’s luxury chalets are completely environmentally sustainable detached homes designed to provide maximum comfort and relaxation.

The project sees the renovation of the private wellness areas, the creation of true oases in which to experience moments of pure well-being. The choice of products was made following the stylistic consistency of the structure, a cozy retreat where the charm of old wood is combined with modern design.

The wellness area sees the installation of emotional showers with the **SPA Home** collection, where guests have the opportunity to rejuvenate after a day on the ski slopes by choosing different types of massage jets and the color therapy function.

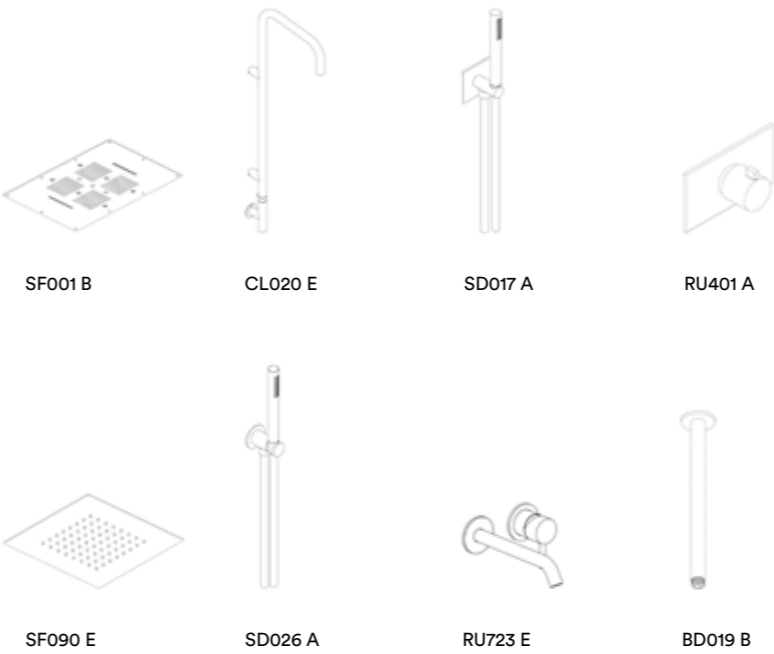

We have paired the false ceiling shower head SF001 B, to the CL020 E wall-mounted shower column from the **Metal 316** collection, and to complete the environment, there is no shortage of mixers and shower sets for an all-around fulfilling experience.

The Kino collection and the modern version of a mountain house

Wood, industrial touches and design details are the elements that characterized the renovation of a house in the historic center of a small town on Lake Maggiore.

The restrained size of the bathroom needed to be enhanced through the choice of a small but characterful shower head.

Kino was the optimal choice: the clean lines, innovative design, and pleasant and balanced massaging rain jets are capable of giving unique sensations, true daily pampering. Accompanying the showerhead are the single-lever basin mixer high and bidet mixer.

The collection is made entirely of stainless steel, a material with high strength characteristics, capable of lasting over time, and appreciated for its inimitable aesthetic value.

Celebrating relaxation and design: Premia Terme

Between the mountains and natural parks of the Ossola Valley, in total balance with the surrounding nature, lies the Premia Terme. A modern facility with innovative technologies and treatments, nestled in a paradisiacal location, the ideal opportunity to unplug from daily toils and indulge in a well-deserved rest amidst the beauty of nature and the benefits of water.

For the renovation of the outdoor pool area, the need arose to install a design product suitable for the architecture of the SPA with the goal of creating a shower area to be used when exiting the pools. This is where the aesthetic purity of our **Metal 316** stainless steel collection shower columns met innovation, practicality, safety, attention to detail, and customization.

Among the fastest-growing design fields, outdoor is perhaps the most challenging, as it demands interaction with the elements, to which steel responds by combining strength and elegance.

The clean design and streamlined profile of our three CL028 E shower columns installed and positioned poolside harmonized perfectly with their surroundings.

CL028 E

Notes

This image shows a full page of blank, lined paper. It features approximately 28 horizontal blue or grey lines spaced evenly apart, typical of notebook paper. The lines extend across the entire width of the page, leaving small margins at the top and bottom. There are no vertical lines, text, or other markings on the page.

Notes

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
