3D Tech Lap, nuestra nueva tecnología, la cuál combina nuestra granilla encajada y un delicado proceso de lapado para crear superficies porcelánicas de gran realismo y profundidad visual.

La integración de la granilla en la propia superficie de la pieza genera sutiles variaciones de textura que enriquecen el diseño y potencian su efecto tridimensional. Posteriormente, el lapado actúa de forma selectiva sobre la superficie, aportando una leve interacción con la luz que realza los detalles gráficos sin perder la esencia mate del material.

El resultado es una superficie elegante y natural, con una suave percepción de profundidad, delicados matices visuales y un tacto sedoso y agradable, que invita al contacto y aporta una experiencia sensorial única.

3D Tech Lap ofrece una nueva forma de entender las superficies cerámicas: más profundidad, más textura y una interacción sutil con la luz para lograr diseños de gran valor estético y naturalidad.

-

3D Tech Lap, our new technology, combines our embedded granules with a delicate lapping process to create porcelain surfaces with exceptional realism and visual depth.

The integration of granules into the body of the surface generates subtle variations in texture that enrich the design and enhance its three-dimensional effect. The lapping process then acts selectively on the surface, creating a subtle interaction with light that highlights the graphic details while preserving the material's natural matt appearance.

The result is an elegant, natural-looking surface with a soft sense of depth, delicate visual nuances and a smooth, pleasant touch that invites contact and provides a unique sensory experience.

3D Tech Lap offers a new way of understanding ceramic surfaces: greater depth, enhanced texture and a subtle interaction with light to achieve designs of outstanding aesthetic value and natural beauty.
