Arttros is a leader in the design and manufacture of solutions for the installation of ceramic flooring and wall coverings. Our constant contributions to the development of exclusive systems, always based on innovation and quality, as well as in-house manufacturing, support our more than 10-year track record.

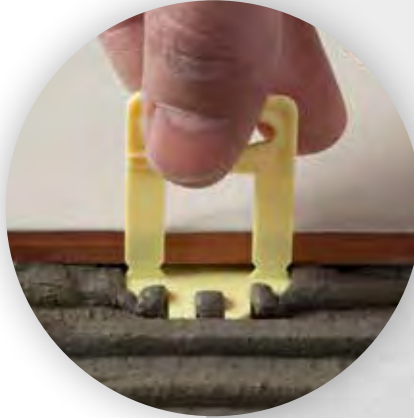

QUALITY, CERTIFIED BY APPLUS

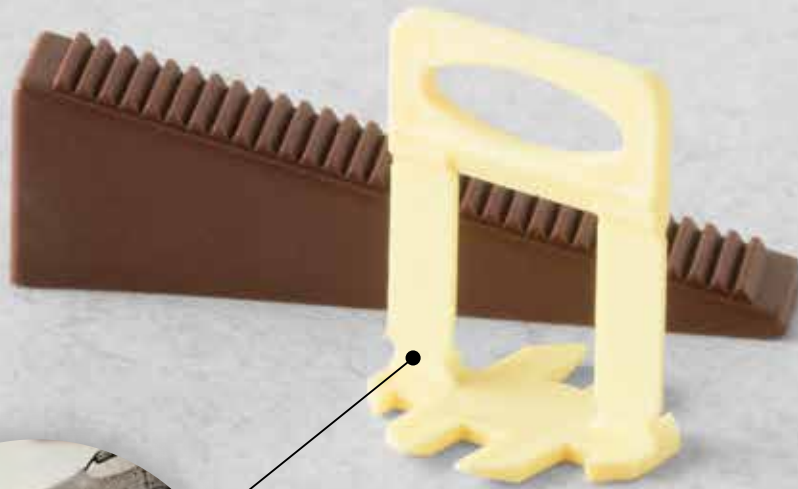

Thanks to our commitment to the highest quality standards, Arttros has become the only levelling system manufacturer certified by Applus, A+ CPF-0358 certificate.

At Arttros, quality is a constant in all our processes and tasks, marking the difference in the results demanded by ceramic professionals.

Mustang Lite is our narrow wedge levelling system that greatly exceeds market standards. With a working range of 3 to 16 mm, a serrated base, and balanced breakage, this system is available in 5 joint widths to cover all professional needs.

ONCE THE CEMENT HAS SET, THE BALANCED BREAKAGE POINT OF THE MUSTANG LITE BASE ENSURES A CLEAN BREAK AND REDUCES SYSTEM REMOVAL TIMES.

OUR DESIGN ALLOWS FOR PERFECT HOLDING.

PERFORATED BASE FOR BETTER HOLDING.

Mustang Pro is our premium levelling system with a wide wedge. It stands out for having the widest working range on the market, from 3 to 20 mm, a unique perforated base that facilitates adhesive flow, and a balanced breakage point, making it a reference in the sector with 6 joint widths available, it adapts optimally to every project.

PLACE THE PIECE WITH YOUR
HAND AND SCREW IN

A new ceramic placement concept based on a vertical screw system. It offers a working range from 3 to 30 mm, and its lack of tools and versatile installation make it a unique system. Three joint widths to choose from.

A SINGLE BASE ALLOWS FOR
ANY TYPE OF INSTALLATION.

BABEL

RAISED FLOOR SYSTEMS

HEAD AVAILABLE IN 2 MM
AND 4 MM JOINT

BABEL is a plot system designed to cover any height with three references.

A single plot to which we will add growth rings according to the needs of each project. The reduction of references translates into time savings and greater versatility.

A SINGLE PLOT, FOR ANY HEIGHT

Using a unique threading system, we can add accessories and raise the system's working range.

STANDARD KIT

MULTIPLE POSSIBILITIES

SMARTHEAD

HEAD FOR BEAM

HEAD WITH SMARTHEAD AND ACOUSTICGRIP

The BABEL head with its innovative SmartHead self-leveling system allows us to correct unevenness of up to 5%. Our AcousticGrip is an absorbent material that prevents movement of the pieces and minimizes sound transfer to the lower part.

PLOT ADAPTER HEAD FOR BEAMS

Facilitates the conversion of floor plots into beam plots.

ACOUSTICGRIP

HEIGHT REGULATION AND LOCKING WITH KEY

The BABEL key allows us to adjust the final height of the system and lock the head in a fixed position. Its ergonomic design provides an optimal grip.
