

In

IN draws on the simplicity of the small format to create a surface with greater visual impact. Its 6x25 cm format is defined by a raised border that frames each tile and creates a subtle interplay of light and shadow, emphasising the rectangular geometry and lending depth to the overall effect. Made from porcelain tiles with a matt finish, the absence of sheen allows the volume and colour to take centre stage in a more understated way, favouring balanced compositions that are easy to integrate into different interior design styles.

IN parte de la sencillez del pequeño formato para construir una superficie con mayor presencia visual. Su formato 6x25 cm se define mediante un relieve real perimetral que enmarca cada pieza y genera un sutil juego de luces y sombras, reforzando la geometría rectangular y aportando profundidad al conjunto. Fabricada en porcelánico y con acabado mate, la ausencia de brillo permite que el volumen y el color adquieran protagonismo de una forma más serena, favoreciendo composiciones equilibradas y fáciles de integrar en diferentes estilos de interiorismo.
