Between Art,
Design and Nature.

Tra Arte,
Design e Natura.

1669 is a project that celebrates lava stone in its most authentic state, shaped only by heat and time. The project was developed in collaboration with the international studio **BIG** - Bjarke Ingels Group.

1669 è un progetto che celebra la pietra lavica nel suo stato più autentico, trasformata unicamente dal calore e dal tempo. Il progetto è stato sviluppato in collaborazione con lo studio internazionale **BIG** - Bjarke Ingels Group.

In 1669, Etna reshaped the landscape.
This collection is made from lava stone born of that eruption.

Nel 1669 l'Etna ha ridisegnato il paesaggio.
La pietra di questa collezione nasce da quell'eruzione.

Lava stone is formed by cooling from a fluid state, just as ice is formed from water.

La pietra lavica prende forma dal raffreddamento della materia fluida, così come il ghiaccio nasce dall'acqua che si solidifica.

— PROCESSO · PROCESS

Without glues, metals, or binders.
Only stone, heat, and gravity.

Senza colle, metalli o leganti.
Solo pietra, calore e gravità.

The pieces are the result of a creative process in
which the stone is transformed solely through its
intrinsic physical properties and the force of heat.

I pezzi sono il risultato di un processo creativo in
cui la pietra si trasforma unicamente attraverso
le sue proprietà fisiche intrinseche e la forza del
calore.

Inside a specially designed kiln, where the typical conditions of a volcanic environment are recreated in a controlled manner, **heat penetrates** deep into the material, transforming its structure, density, and chromatic qualities.

All'interno di un forno appositamente progettato, che ricrea in modo controllato le condizioni tipiche di un ambiente vulcanico, il **calore penetra** in profondità nel materiale, trasformandone la struttura, la densità e le qualità cromatiche.

The uniqueness
of Lava Stone.

L'unicità della
Pietra Lavica.

Each table is unique, as the lava stone transforms
within the kiln, taking on a different shape each
time.

Ogni tavolo è unico, poiché la pietra lavica si
trasforma all'interno del forno, assumendo ogni
volta forme diverse.
