PORCELAIN TILES: A SAFE CHOICE
SUSTAINABILITY & CERTIFICATIONS

[WE CARE >](#)

The aesthetics of Italian design.

© Ceramiche Atlas Concorde

In cooperation with Mario Ferrarini, Atlas Concorde proposes Dialogo, a collection of sinks and matching furniture that enhance the exceptional qualities of porcelain tiles and amplify the aesthetic and design appeal of bathroom furniture. Sophisticated and trendy Italian design creations.

In collaborazione con Mario Ferrarini, Atlas Concorde propone Dialogo, una collezione di lavabi e mobili coordinati che valorizzano le eccezionali qualità del gres porcellanato e amplificano la portata estetica e progettuale dell'arredo bagno. Creazioni di design italiano, ricercate e di tendenza.

En collaboration avec Mario Ferrarini, Atlas Concorde propose Dialogo, une collection de lavabos et de meubles coordonnés qui mettent en valeur les qualités exceptionnelles du grès cérame et amplifient la portée esthétique et conceptuelle de l'ameublement de salle de bains. Des créations de design italien, recherchées et tendance.

In Zusammenarbeit mit Mario Ferrarini stellt Atlas Concorde Dialogo vor, eine Kollektion von Waschtischen und dazu passenden Möbeln, die die außergewöhnlichen Qualitäten des Feinsteinzeugs hervorheben und die ästhetischen und gestalterischen Möglichkeiten der Badezimmermöbel erweitern. Anspruchsvolle und trendige italienische Design-Kreationen.

En colaboración con Mario Ferrarini, Atlas Concorde propone Dialogo, una colección de lavabos y muebles a juego que realzan las cualidades excepcionales del porcelánico y amplifican el impacto estético y decorativo de los muebles de baño. Creaciones con un diseño italiano, refinadas y modernas.

В сотрудничестве с Mario Ferrarini Atlas Concorde предлагает Dialogo, коллекцию сочетающихся раковин и мебели, которые подчеркивают исключительные качества керамогранита и усиливают эстетику и дизайн интерьера ванных комнат. Изысканные и трендовые творения итальянского дизайна.

Dialogo: an exclusive bathroom furniture proposal.

reddot winner 2022

Everything takes shape from a blank sheet of paper, where the designer has traced some marks to imagine a new dimension of bathroom furniture. Dialogo originates from these simple gestures and expresses itself with an elegant and measured language, in a perfect balance of thicknesses, sections, volumes and material suggestions, to celebrate the bathroom. All this results in an exclusive design proposal that suggests carefully studied combinations of sinks, coordinated furniture and Atlas Concorde floor and wall tile collections to create settings that combine a refined aesthetic taste with the exceptional technical performance of porcelain tiles.

Tutto prende forma da un foglio bianco, sul quale il designer ha tracciato dei segni per immaginare una nuova dimensione dell'arredo bagno. Da questi gesti nasce Dialogo, che si esprime con un linguaggio ricercato e calibrato, in perfetto equilibrio tra spessori, sezioni, volumi e suggestioni materiche, per celebrare l'ambiente bagno. Il risultato è una proposta di design esclusiva, che propone abbinamenti attentamente studiati tra lavabi, mobili coordinati e collezioni di pavimenti e rivestimenti Atlas Concorde, per realizzare ambientazioni che declinano una raffinata sensibilità estetica con l'eccellenza delle capacità di resa tecnica del gres porcellanato.

Tout prend forme à partir d'une feuille blanche, sur laquelle le designer a tracé des signes pour imaginer une nouvelle dimension de l'ameublement de salle de bains. De ces signes naît Dialogo, qui s'exprime avec un langage recherché et calibré, parfait équilibre entre épaisseurs, sections, volumes et suggestions matérielles afin de mettre en valeur la salle de bains. Le résultat est une proposition design exclusive, qui offre des assortiments soigneusement étudiés entre lavabos, meubles coordonnés et collections de sols et revêtements muraux Atlas Concorde, pour réaliser des espaces qui associent une sensibilité esthétique raffinée et le rendu technique exceptionnel du grès cérame.

Ein weißes Blatt machte den Anfang: Der Designer zeichnete ein paar Konturen für eine neue Dimension des Badezimmers. Aus diesen Zeichnungen entstand das in raffinierter Designsprache realisierte Produkt Dialogo in perfektem Gleichgewicht von Stärken, Abschnitten, Volumen und Materialvorschlägen, um das Badezimmer aufzuwerten. Das Ergebnis ist ein exklusiver Designvorschlag, der sorgfältig durchdachte Kombinationen von Waschtischen, abgestimmten Möbeln sowie Boden- und Wandbeläge von Atlas Concorde vorsieht, um Ambiente zu schaffen, die ein raffiniertes ästhetisches Empfinden mit den außergewöhnlichen technischen Leistungen des Feinsteinzeug verbinden.

Attention to detail.

Mario Ferrarini works alongside international companies on various projects ranging from industrial products, furniture and interior design. "We create timeless products that go beyond passing trends. Our aim is to find lasting solutions for our customers with production aimed at the large consumer market."

Mario Ferrarini lavora al fianco di aziende internazionali su diversi progetti che spaziano dai prodotti industriali, all'arredamento e all'interior design. "Creiamo prodotti senza tempo che trascendono le tendenze passeggeri. Il nostro obiettivo è trovare soluzioni durature per i nostri clienti con una produzione rivolta al mercato di grandi consumatori."

Mario Ferrarini travaille en collaboration avec des entreprises internationales sur divers projets qui vont des produits industriels à l'ameublement et au design d'intérieur. « Nous créons des produits intemporels qui transcendent les tendances passagères. Notre objectif est de trouver des solutions durables pour nos clients avec une production qui s'adresse au marché de la grande consommation. »

Mario Ferrarini arbeitet mit internationalen Unternehmen an verschiedenen Projekten zusammen, die von Industrieprodukten bis hin zum Design. „Wir kreieren zeitlose Produkte, die sich von vorübergehenden Trends abheben. Unser Ziel ist es, mit einer auf den Großverbrauchsmarkt ausgerichteten Produktion nachhaltige Lösungen für unsere Kunden zu finden.“

Mario Ferrarini trabaja junto a empresas internacionales en varios proyectos de diseño industrial, de mobiliario o interiorismo. «Creamos productos atemporales que trascienden las tendencias pasajeras. Nuestro objetivo es encontrar soluciones duraderas para nuestros clientes con una producción dirigida al mercado de gran consumo.»

Mario Ferrarini работает бок о бок с международными компаниями над различными проектами, от промышленных товаров до мебели и дизайна интерьеров. "Мы создаем продукцию вне времени, которая выходит за рамки преходящих тенденций. Наша цель – найти долгосрочные решения для наших клиентов с производством, ориентированным на большой потребительский рынок".

Elements designed down to the last detail.

© Ceramiche Atlas Concorde

With matching sinks and furniture, Dialogo offers two types of elements designed down to the smallest detail to establish a new and advanced combination of design refinement and design functionality. Proposals with a high aesthetic value and at the same time guaranteeing excellent performance.

Con i lavabi e i mobili coordinati, Dialogo propone due tipologie di elementi studiati nei minimi dettagli per stabilire un nuovo e avanzato connubio tra ricercatezza di design e funzionalità progettuale. Proposte dall'alto valore estetico e al tempo stesso in grado di garantire un'eccellente resa prestazionale.

Avec les lavabos et les meubles coordonnés, Dialogo propose deux types d'éléments étudiés dans les moindres détails pour créer un assortiment innovant entre raffinement du design et fonctionnalité conceptuelle. Des propositions à forte valeur esthétique tout en étant capables de garantir des performances élevées.

Mit den passenden Waschtischen und Möbeln bietet Dialogo zwei bis ins kleinste Detail durchdachte Elementtypen, die eine neue und fortschrittliche Kombination aus Raffiniertheit und Funktionalität schaffen. Vorschläge mit einem hohen ästhetischen Wert, die gleichzeitig eine hervorragende Leistung garantieren.

Porcelain tile values: aesthetics, resistance and hygiene.

In all the sink elements of the Dialogo line, the availability of the accessible basin makes it possible to combine aesthetics with ease of cleaning. Hygienic and extremely hard-wearing, the basins focus on the unrivalled qualities of porcelain to give resistance and durability to bathroom furnishings.

In tutti gli elementi lavabo della linea Dialogo, la disponibilità della vasca ispezionabile permette di coniugare estetica con facilità di pulizia. Igieniche, estremamente resistenti, le vasche mettono al centro le qualità impareggiabili del gres porcellanato per dare forza e durevolezza all'arredo bagno.

Dans tous les éléments lavabo de la ligne Dialogo, la disponibilité du fond de cuve inspectable permet d'associer esthétique et facilité de nettoyage. Hygiéniques et extrêmement résistantes, les cuves mettent en valeur les qualités incomparables du grès cérame pour donner de la force et de la durabilité à l'ameublement de salle de bains.

Bei allen Waschtisch-Elementen der Linie Dialogo ermöglicht die Verfügbarkeit des inspizierbaren Beckens die Kombination von Ästhetik und einfacher Reinigung. Die hygienischen und extrem widerstandsfähigen Becken setzen auf die unübertroffenen Qualitäten des Feinsteinzeugs, damit das Bad auf Dauer schön bleibt.

Todos los lavabos de la línea Dialogo cuentan con un seno inspeccionable, permitiendo combinar estética con facilidad de limpieza. Higiénicos y extremadamente resistentes, los senos aprovechan las ventajas inigualables del porcelánico para dar solidez y durabilidad a los muebles de baño.

Во всех вариантах раковин линейки Dialogo наличие чаши с доступом для обслуживания позволяет сочетать эстетичность с простотой чистки. Гигиеничные, чрезвычайно прочные чаши наглядно демонстрируют непревзойденные качества керамогранита, делающего мебель для ванных комнат прочной и долговечной.

Technical features

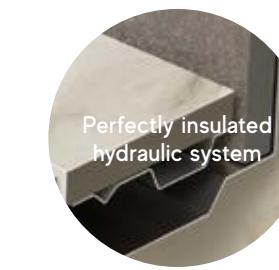

Quality processes and technologies: the use of the most advanced manufacturing techniques, the best materials and stringent quality testing protocols allow the products to achieve very high aesthetic and functional performance.

Drain access: rotating the swinging panel makes it possible to access the basin, allowing any remaining dirt to be easily removed.

Continuous vein: the study of cuts and projections, as well as the use of state-of-the-art technology, makes it possible to develop and maintain vein continuity.

Perfectly insulated hydraulic system: the one-piece stainless steel basin prevents water infiltration and ensures perfect hydraulic insulation of the object over time.

High impact resistance: the composite structure has been designed and tested to ensure high impact resistance.

Great stability: the fixing system consisting of specially designed metal brackets ensures high stability and structural sturdiness.

Processi e tecnologie di qualità: l'utilizzo delle più avanzate tecniche di lavorazione, dei migliori materiali nonché di stringenti protocolli di qualità permettono di raggiungere un'elevatissima performance estetica e funzionale.

Vasca ispezionabile: attraverso la rotazione della basculante è possibile ispezionare la vasca, consentendo di rimuovere con facilità ogni eventuale residuo di sporco

Continuità di vena: lo studio dei tagli e delle proiezioni, nonché l'utilizzo di tecnologie all'avanguardia, permette di sviluppare e mantenere la continuità di vena.

Sistema idraulico perfettamente isolato: la vasca monoblocco in acciaio inossidabile evita le infiltrazioni di acqua e garantisce nel tempo il perfetto isolamento idraulico dell'oggetto.

Alta resistenza agli urti: la struttura composita è stata progettata e testata in modo da garantire una grande resistenza agli urti.

Grande stabilità: il sistema di fissaggio costituito da delle staffe in metallo appositamente studiate ne garantiscono un'elevata stabilità e solidità strutturale.

Cleaning and maintenance

SANITIZING

Porcelain tiles surfaces are extremely easy to sanitize, owing to the physical and mechanical features of this material. Indeed, since they are produced at extremely high temperatures, they prove entirely poreless, which prevents mold, mildew and bacteria from spreading. This means sanitizing products or products with a specific concentration of chemicals capable of eradicating germs and bacteria from surfaces can easily be used, for optimum efficiency and without worrying about damaging the material itself.

ROUTINE CLEANING

For routine cleaning, simply use a damp sponge or a microfiber cloth with hot water and ordinary neutral detergent* then wipe dry with a soft cloth. To remove dirt built up in the corners, we recommend you rub with a nonabrasive soft bristle brush. Avoid using:

1. Products with waxing, restoring, polishing, brightening properties;
2. Products containing hydrofluoric acid and its derivatives;
3. Metal wire pads (iron and steel pads) or excessively abrasive pads.

CAUTION: Porcelain tiles do not require the application of waxes or detergents with polishing additives, even when the surface is glossy/lapped.

*such as Clean Universal made by Faber Chimica or Fila Clean&Shine for the Italian market - Fila Cleanall for the US market - Fila Brio for all other markets.

EXTRAORDINARY CLEANING

In the event of tough stains, which cannot be removed during routine cleaning operations, we suggest the use of alkaline detergents* for coffee, fruit juice, wine, ink stains and the like, acidic detergents** in the event of limescale residue (or rust), use specific detergents to remove silicone sealant residue***

*such as Clean Degreaser - Deep Degreaser made by Faber Chimica or Fila Powerclean for the Italian market - Fila Hobby for other markets.

**such as Clean Limescale - Tile Cleaner made by Faber Chimica or Fila Deepclean for the Italian market - Fila Via Bagno for other markets.

***such as Epoxy Cleaner made by Faber Chimica or Fila Zerosil.

STEEL SURFACES

Stainless steel is an extremely strong material and is not subject to the corrosive action of oxidation. However, specific products should be used for cleaning it.

In addition, to avoid damaging the surface, do not use:

1. sponges or scourers that could cause irreversible scratches and abrasions;
2. aggressive chemicals;
3. cleaning products based on ammonia, bleach or chlorine.

LACQUERED SURFACES

Daily cleaning and maintenance of the lacquered surfaces of the drawer unit. To maintain lacquered surfaces for as long as possible and in the best possible condition, proceed as follows:

1. Treat the stain promptly, allowing it to remain in contact with the surface for as little time as possible.
2. Only use a moistened microfiber cloth, white if possible. Do not use sponges or rags that could scratch the surface.
3. Use a NON-abrasive, neutral liquid soap solution. Marseille soap is particularly suitable. Simply dilute a few flakes in a bowl with lukewarm water, lightly dampen the cloth and wipe the surface.
4. After wiping, it is best to rinse and dry quickly, taking care to use a dry cloth different from the one used for cleaning. Air drying is not recommended because halos or traces of water may remain.
5. Do not use organic solvents such as acetone and alcohol, do not use detergents containing strong acids, kitchen detergents and substances containing ammonia, trichloroethylene and bleach.

IGIENIZZAZIONE

Le superfici in gres porcellanato sono estremamente facili da igienizzare, grazie alle caratteristiche fisico-mecaniche di questo materiale. Infatti, essendo prodotta ad altissime temperature, risulta totalmente priva di pori, fatto che impedisce a muffe e batteri di proliferare. È possibile utilizzare pertanto senza problemi prodotti igienizzanti ossia con una determinata concentrazione di sostanze in grado di eliminare germi e batteri dalle superfici, con la massima efficacia e senza temere di rovinare il materiale stesso.

PULIZIA ORDINARIA

Per la pulizia quotidiana è sufficiente utilizzare una spugna inumidita o un panno in microfibra con acqua calda e un comune detergente neutro* asciugando con un panno morbido. Per la rimozione di sporco accumulatosi negli angoli si suggerisce di strofinare con uno spazzolino con setole morbide non abrasive.

Evitare l'utilizzo di:

1. Prodotti con caratteristiche ceranti, ravvivanti, lucidanti, brillantanti;
2. Prodotti che contengono acido fluoridrico e suoi derivati;
3. Pagliette di metallo (spugnette di ferro e acciaio) o eccessivamente abrasive.

ATTENZIONE: Il gres porcellanato non richiede l'applicazione di cere o di detergenti con additivi lucidanti anche quando ha una superficie lucida/lappata.

*tipo Clean Universal della Faber Chimica oppure Fila Clean&Shine per mercato IT - Fila Cleanall per mercato USA - Fila Brio per tutti gli altri mercati.

PULIZIA STRAORDINARIA

Nel caso di macchie ostinate, non rimovibili con la pulizia ordinaria, si suggerisce di utilizzare detergenti a base alcalina* per caffè, succhi di frutta, vino, inchiostro, ed etc... detergenti a base acida** nel caso di residui di calcare (o ruggine) utilizzare detergenti specifici per la rimozione di residui di sigillanti siliconici***

*tipo Clean Degreaser - Deep Degreaser della Faber Chimica oppure Fila Powerclean per mercato IT - Fila Hobby per gli altri mercati.

**tipo Clean Limescale - Tile Cleaner della Faber Chimica oppure Fila Deepclean per il mercato IT - Fila Via Bagno per gli altri mercati.

***tipo Epoxy Cleaner della Faber Chimica oppure Fila Zerosil.

SUPERFICI IN ACCIAIO

L'acciaio inox è un materiale estremamente resistente e non è soggetto all'azione corrosiva dell'ossidazione. Tuttavia per la pulizia è opportuno adoperare prodotti specifici.

Inoltre per evitare il danneggiamento della superficie non utilizzare:

1. spugne o pagliette metalliche che potrebbero generare graffi ed abrasioni irreversibili;
2. sostanze chimiche aggressive;
3. prodotti per la pulizia a base di ammoniaca, candeggina o cloro.

SUPERFICI LACCATE

Pulizia e manutenzione quotidiana delle superfici laccate della cassetiera.

Per conservare le superfici laccate per il maggior tempo e nella migliore condizione possibile, è necessario rispettare e seguire i seguenti punti:

1. Agire tempestivamente sulla macchia, lasciando che questa rimanga il minor tempo possibile a contatto con la superficie;
2. Utilizzare esclusivamente un panno in microfibra inumidito, possibilmente bianco. Non utilizzare spugne o stracci che potrebbero graffiare la superficie;
3. Utilizzare una soluzione di sapone liquido neutro NON abrasivo. Particolarmente indicato è il Sapone di Marsiglia, sarà sufficiente diluire alcune scaglie in una bacinella d'acqua tiepida, bagnare leggermente il panno e passarlo sulla superficie;
4. Dopo aver passato il panno, è bene procedere con le operazioni di risciacquo e asciugatura in maniera rapida, avendo cura di usare un

panno asciutto diverso da quello utilizzato per la pulizia. L'asciugatura all'aria è consigliata perché potrebbero rimanere aloni o tracce di acqua;

5. Non usare solventi organici come acetone ed alcool, non usare detergenti contenenti acidi forti, detergenti per cucina e sostanze contenenti ammoniaca, trielina e candeggina.

NETTOYAGE

Les surfaces en grès sont très faciles à nettoyer grâce aux caractéristiques physiques et mécaniques de ce matériau. En effet, étant produit à des températures très élevées, il n'a aucun pore ce qui empêche la prolifération des moisissures et des bactéries. Il est donc possible d'utiliser sans problème des produits de nettoyage, ou avec une concentration de substances déterminée, capables d'éliminer des germes et des bactéries des surfaces, avec une efficacité maximale et sans craindre de dégrader le matériau.

NETTOYAGE ORDINAIRE

Pour le nettoyage quotidien, il suffit d'utiliser une éponge humide ou un chiffon en microfibre avec de l'eau chaude et un détergent neutre* courant puis d'essuyer avec un chiffon doux. Pour éliminer la saleté accumulée dans les coins, il est conseillé de frotter avec une petite brosse à poils doux non abrasifs. Éviter d'utiliser :

1. Produits comme de la cire ou permettant d'éclaircir ou de faire briller le support ;
2. Produits qui contiennent de l'acide fluorhydrique et ses dérivés ;
3. Pailles métalliques (pailles et fer et d'acier) ou excessivement abrasives.

ATTENTION : Le grès cérame ne nécessite pas l'application de cires ou de détergents avec des additifs permettant de faire briller même quand sa surface est brillante/demi-polie.

*type Clean Universal de Faber Chimica ou Fila Clean&Shine pour le marché IT - Fila Cleanall pour le marché USA - Fila Brio pour tous les autres marchés.

NETTOYAGE EXTRAORDINAIRE

En cas de taches tenaces, impossibles à éliminer avec un nettoyage ordinaire, il est conseillé d'utiliser des détergents alcalins* pour le café, les jus de fruit, le vin, l'encre, etc., des détergents acides** dans le cas de résidus de calcaire (ou de rouille) et d'utiliser des détergents spécifiques pour l'élimination de résidus de mastic à base de silicone***.

*type Clean Degreaser - Deep Degreaser de Faber Chimica ou Fila Powerclean pour le marché IT - Fila Hobby pour les autres marchés.

**type Clean Limescale - Tile Cleaner de Faber Chimica ou Fila Deepclean pour le marché IT - Fila Via BAGNO pour les autres marchés.

***type Epoxy Cleaner de Faber Chimica ou Fila Zerosil.

SURFACES EN ACIER

L'acier inoxydable est un matériau extrêmement résistant et n'est pas soumis à l'action corrosive de l'oxydation. Toutefois, pour son nettoyage, il faut utiliser des produits spécifiques.

En outre, afin d'éviter l'endommagement de la surface, ne pas utiliser de :

1. éponges ou éponges métalliques, qui pourraient créer des rayures et abrasions irréversibles ;
2. substances chimiques agressives ;
3. produits d'entretien à base d'ammoniac, javel ou chlore.

SURFACES LAQUÉES

Nettoyage et entretien quotidien des surfaces laquées du meuble à tiroirs.

Pour conserver les surfaces laquées le plus longtemps possible et dans les meilleures conditions possibles, il est nécessaire de respecter et de suivre les points suivants :

1. Agir immédiatement sur la tache, en la laissant le moins longtemps possible au contact de la surface ;
2. Utiliser exclusivement un chiffon en microfibre humide, si possible blanc.

Ne pas utiliser d'éponges ou de chiffons pouvant rayer la surface ;

3. Utiliser une solution de savon liquide neutre NON abrasif. Le savon de Marseille est particulièrement conseillé, il suffira de diluer quelques copeaux dans une bassine d'eau tiède, de tremper légèrement le chiffon et de le passer sur la surface ;

4. Après avoir passé le chiffon, il vaut mieux rincer et essuyer rapidement, en prenant soin d'utiliser un chiffon sec différent de celui qu'on a utilisé pour le nettoyage. Le séchage à l'air est déconseillé car des halos ou des traces d'eau pourraient rester ;

5. Ne pas utiliser de solvants organiques comme l'acétone et l'alcool, ne pas utiliser de détergents contenant des acides forts, de détergents pour la cuisine et de substances contenant de l'ammoniac, du trichloroéthylène et de la javel.

PRODUCT RANGE & TECHNICAL SPECS.

TECHNICAL FEATURES

PRODUCT RANGE

COLORS AND FINISHES

CLEANING AND MAINTENANCE

WE CARE

Note

1. Metallschwämme oder -pads, die irreversible Kratzer und Abschürfungen verursachen können;
2. Aggressive Chemikalien;
3. Reinigungsmittel auf der Basis von Ammoniak, Bleichmittel oder Chlor.

LACKIERTE OBERFLÄCHEN

Tägliche Reinigung und Pflege der lackierten Oberflächen des Schubladenschrankes.

Um lackierte Oberflächen möglichst lange und in bestmöglichem Zustand zu erhalten, müssen folgende Punkte beachtet und befolgt werden:

1. Flecken sollten immer zügig entfernt werden, so dass sie nur so kurz wie möglich mit der Oberfläche in Kontakt bleiben.
2. Für die Reinigung ausschließlich ein wenn möglich weißes, angefeuchtetes Mikrofasertuch verwenden. Keine Schwämme oder Lappen benutzen, die die Oberfläche zerkratzen könnten;
3. Eine neutrale Flüssigseifenlösung ohne Scheuerwirkung verwenden. Besonders geeignet ist die Marseiller Seife: Einfach ein paar Flocken in einem Behälter mit lauwarmem Wasser verdünnen, das Tuch leicht anfeuchten und die Oberfläche abwischen.
4. Nach dem Reinigen am besten schnell abspülen und abtrocknen. Hierzu ein neues trockenes Tuch verwenden. Es ist nicht angebracht, die Flächen an der Luft trocknen zu lassen, weil dies zu Fleckenschimmern führen könnte.
5. Keine organischen Lösungsmittel wie Aceton und Alkohol, keine stark säurehaltigen Reinigungsmittel, Küchenreiniger und ammoniak-, trichlorethylen- und bleichmittelhaltige Reinigungsmittel benutzen.

HIGIENIZACIÓN

Las superficies de gres son extremadamente fáciles de higienizar, gracias a las características físico-mecánicas de este material. De hecho, al producirse a temperaturas muy elevadas, está totalmente libre de poros, lo que evita la proliferación de moho y bacterias. Por lo tanto, es posible utilizar sin problemas productos higienizantes o con una determinada concentración de sustancias capaces de eliminar gérmenes y bacterias de las superficies, con la máxima eficacia y sin miedo a dañar el propio material.

LIMPIEZA HABITUAL

Para la limpieza diaria, simplemente use una esponja húmeda o un paño de microfibra con agua caliente y un detergente neutro común*, y seque con un paño suave. Para eliminar la suciedad acumulada en las esquinas, se recomienda frotar con un cepillo de cerdas suaves no abrasivas. Evite el uso de:

1. Productos con características de encerado, reavivación, pulido y abrillantado;
2. Productos que contienen ácido fluorhídrico y sus derivados;
3. Estropajos metálicos (de hierro y acero) o excesivamente abrasivos.

ATENCIÓN: El gres porcelánico no requiere la aplicación de ceras o detergentes con aditivos de pulido incluso cuando tiene una superficie pulida/lapeada.

*tipo Clean Universal de Faber Chimica o Fila Clean&Shine para el mercado Italia - Fila Cleanall para el mercado Estados Unidos - Fila Brio para todos los demás mercados.

LIMPIEZA EXTRAORDINARIA

En caso de manchas rebeldes de café, zumos de fruta, vino, tinta, etc. que no se puedan eliminar con la limpieza habitual, se recomienda utilizar detergentes de base alcalina*

detergentes de base ácida** en el caso de residuos de cal (u óxido) utilice detergentes específicos para eliminar los residuos de selladores de silicona***

*tipo Clean Degreaser - Deep Degreaser de Faber Chimica o Fila Powerclean para el mercado Italia - Fila Hobby para los demás mercados.

**tipo Clean Limescale - Tile Cleaner de Faber Chimica o Fila Deepclean para el mercado Italia - Fila Via Bagno para los demás mercados.
***tipo Epoxy Cleaner de Faber Chimica o Fila Zerosil.

SUPERFICIES DE ACERO

El acero inoxidable es un material extremadamente resistente y no está sujeto a la acción corrosiva de la oxidación. No obstante, para la limpieza se recomienda utilizar productos especiales.

Aemás, para evitar dañar la superficie, no hay que usar:

1. estropajos ni esponjas de acero que podrían producir arañazos y abrasiones irreversibles;
2. productos químicos agresivos;
3. productos de limpieza a base de amoníaco, lejía o cloro.

SUPERFICIES LACADAS

Limpieza y mantenimiento diario de las superficies lacadas de la cajonera. Para conservar las superficies lacadas durante más tiempo y en las mejores condiciones posibles, se deben respetar y seguir los siguientes puntos:

1. Trate la mancha lo antes posible para que no esté en contacto con la superficie demasiado tiempo;
2. Utilice únicamente un paño de microfibra húmedo, preferiblemente blanco. No utilice estropajos o trapos que puedan rayar la superficie;
3. Utilice una solución jabonosa líquida neutra NO abrasiva. El jabón de Marsella es un producto especialmente idóneo, bastará con diluir unas escamas en un recipiente con agua tibia, humedecer ligeramente el paño y frotar la superficie;
4. Después de pasar el paño, se recomienda aclarar y secar rápidamente, procurando utilizar un paño seco distinto al utilizado para la limpieza. No se recomienda el secado al aire porque pueden quedar halos o restos de agua;
5. No utilice disolventes orgánicos como acetona y alcohol, ni detergentes que contengan ácidos fuertes, detergentes de cocina ni sustancias que contengan amoníaco, tricloroetileno o lejía.

САНИТАРНАЯ ОБРАБОТКА

Плитку из керамогранита очень легко дезинфицировать благодаря физико-механическим характеристикам материала. Очень высокая температура производства плитки из керамогранита позволяет добиться полного отсутствия пор, благодаря чему на поверхности плитки не размножаются бактерии и плесень. Данная особенность плитки позволяет с максимальной эффективностью и без опасения повредить материал использовать дезинфицирующие средства или продукты с определенной концентрацией активных веществ, способных уничтожать микробы и бактерии на поверхностях.

ЕЖЕДНЕВНАЯ ОЧИСТКА

Для ежедневной очистки достаточно использовать влажную губку или салфетку из микрофибры, смоченную теплой водой и обычным нейтральным моющим средством*. После очищения плитку следует насухо вытереть мягкой тряпкой. Чтобы удалить скопившуюся в углах грязь, рекомендуется протирать плитку щеткой с мягкой неабразивной щетиной. Запрещается использовать:

1. Продукты, содержащие воски или парафины, и придающие поверхности хороший внешний вид и блеск.
2. Продукты, содержащие плавиковую кислоту и ее соединения.
3. Металлические мочалки (стальные губки) или другие абразивные материалы.

ВНИМАНИЕ! Плитка из керамогранита не требует применения воска или моющих средств с полировальными добавками, даже если она имеет полированную/лаппатированную поверхность.

*например, «Clean Universal» от производителя Faber Chimica, «Fila Clean&Shine» для итальянского рынка, «Fila Cleanall» для рынка США

или «Fila BRIO» для всех остальных рынков.

УСТРАНЕНИЕ СТОЙКИХ ЗАГРЯЗНЕНИЙ

В случае возникновения стойких пятен, которые невозможна удалить в процессе ежедневной очистки, рекомендуется использовать щелочные моющие средства*. Для устранения пятен кофе, фруктовых соков, вина, чернил и т. д. рекомендуется использовать моющие средства на кислотной основе**. Для устранения известкового налета (или ржавчины) рекомендуется использовать специальные моющие средства для удаления остатков силиконовых герметиков***

*например, «Clean Degreaser - Deep Degreaser» от производителя Faber Chimica, «Fila Powerclean» для итальянского рынка, «Fila Hobby» для других рынков.

**например, «Clean Limescale - Tile Cleaner» от производителя Faber Chimica, «Fila Deepclean» для итальянского рынка, «Fila Via Bagno» для других рынков.

***например, «Epoxy Cleaner» от производителя Faber Chimica или «Fila Zerosil».

СТАЛЬНЫЕ ПОВЕРХНОСТИ

Нержавеющая сталь является чрезвычайно прочным материалом и не подвержена коррозионному воздействию окисления. Однако для ее очистки следует использовать специальные средства. Кроме того, во избежание повреждения поверхности не используйте:

1. металлические губки или мочалки, которые могут оставить навсегда царапины и потертысти;
2. агрессивные химические вещества;
3. чистящие средства, содержащие аммиак, отбеливатель или хлор.

ЛАКИРОВАННЫЕ ПОВЕРХНОСТИ

Ежедневная чистка и уход за лакированными поверхностями комода. Для того чтобы сохранить лакированные поверхности как можно дольше и в наилучшем состоянии, необходимо соблюдать и выполнять следующие пункты:

1. Оперативно воздействуйте на пятно, позволяя ему оставаться в контакте с поверхностью как можно меньше времени.

2. Используйте только влажную тряпку из микрофибры, предпочтительно белого цвета. Не используйте губки или тряпки, которые могут поцарапать поверхность.

3. Используйте неабразивный нейтральный жидкый мыльный раствор. Особенно хорошо подходит хозяйственное мыло. Просто разведите несколько хлопьев в миске с теплой водой, слегка смочите тряпку и протрите поверхность.

4. После протирания лучше всего быстро прополоскать и протереть насухо поверхность, стараясь использовать не ту сухую тряпку, которая использовалась для очистки. Сушка естественным путем на воздухе не рекомендуется, так как могут ость разводы или следы воды.

5. Не используйте органические растворители, такие как ацетон и спирт, не используйте моющие средства, содержащие сильные кислоты, кухонные моющие средства и вещества, содержащие аммиак, трихлорэтилен и отбеливатель.

CAUTION

Avoid accidental shocks that could result in chipping or irreversible damage. In the event of breakage, check that the structural parts are not damaged and, if necessary, discard the item. Avoid any improper use of the items and their components. Some removable parts could be used as blunt objects. Be careful: sharp edges and possible razor-sharp surfaces.

ATTENZIONE

Evitare urti accidentali che potrebbero provocare sbreccature o lesioni non ripristinabili. In presenza di rotture verificare che le parti strutturali non siano compromesse e nel caso mettere fuori uso l'oggetto. Evitare qualsiasi uso improprio degli articoli e dei loro componenti. Alcune parti removibili potrebbero essere utilizzate come oggetti contundenti. Prestare attenzione: spigoli acuminati e possibile presenza di superfici taglienti.

ATTENTION

Éviter les chocs accidentels qui pourraient provoquer des ébréchures ou des lésions impossibles à réparer. En cas de ruptures, vérifier que les parties structurelles ne soient pas compromises et si c'est le cas, mettre l'objet hors d'usage. Éviter tout usage impropre des articles et de leurs composants. Certaines parties amovibles pourraient être utilisées comme des objets susceptibles de blesser. Faire attention : arêtes vives et présence possible de surfaces coupantes.

ACHTUNG

Stöße sind zu vermeiden, da sie zu Absplitterungen oder Schäden führen könnten, die nicht reparierbar sind. Im Falle von Schäden muss sichergestellt werden, dass die Strukturteile keine Schäden erlitten haben. Ansonsten sollte der Gegenstand nicht mehr genutzt werden. Jede unsachgemäße Verwendung der Artikel und ihrer Bestandteile ist zu vermeiden. Einige abnehmbare Teile könnten bei unsachgemäßem Gebrauch Verletzungen hervorrufen. Immer vorsichtig sein und auf scharfe Kanten und Teile achten.

ATENCIÓN

Evite impactos accidentales que puedan causar mellas o lesiones irreparables. Si se observan roturas, compruebe que las partes estructurales no estén afectadas y, si es necesario, deje de utilizar el objeto. Evite cualquier uso indebido de los artículos y sus componentes. Algunas partes extraíbles podrían usarse como objetos contundentes. Cuidado: podría haber bordes puntiagudos y superficies afiladas.

ВНИМАНИЕ

Избегайте случайных ударов, которые могут вызвать сколы или необратимые повреждения. В случае поломки проверьте, не повреждены ли конструктивные элементы, и, если необходимо, выведите изделие из эксплуатации. Избегайте любого ненадлежащего использования изделий и их компонентов. Некоторые съемные детали могут быть использованы в качестве тупых предметов. Будьте осторожны: острые края и возможное наличие режущих кромок.

● HYGIENIC Igienico

The ideal material for bathroom surfaces: the surfaces are easy to sanitize thanks to its compact nature and chemical-physical stability.

Un materiale ideale per le superfici bagno: le superfici sono facilmente igienizzabili grazie alla sua compattezza e la sua stabilità chimico-fisica.

● RESISTANT Resistente

The superior surface hardness makes it especially resistant to scratches and everyday wear.

L'elevata durezza superficiale lo rende particolarmente resistente ai graffi ed all'usura quotidiana.

● EASY TO CLEAN Facile da pulire

Waterproof properties teamed with a compact nature make this material resistant to chemicals and therefore easy to clean.

L'impermeabilità assieme alla compattezza lo rende un materiale resistente agli agenti chimici e di conseguenza facilmente pulibile.

● MATCHABLE Coordinabile

The perfect matching with Atlas Concorde surfaces harmonizes every setting.

La perfetta abbinabilità con le superfici Atlas Concorde dona armonia a ogni ambiente.

MADE IN ITALY

The Made in Italy logo of Atlas Concorde stands for style, quality and ethics. Having firmly adhered to the Ethical Code promoted by Confindustria Ceramica, Atlas Concorde places the Made in Italy logo on all the products designed and produced in Italy, that is to say ceramic tiles, decorations and the majority of special trim tiles. Only a small amount of the latter is manufactured in Spain. Atlas Concorde products are produced using eco-friendly technologies, top quality and safe raw materials with the best working conditions guaranteed for our personnel. For these reasons, Atlas Concorde's Made in Italy is the expression of strong values such as style, design, product quality, and respect for the environment and the people who live in it.

Il marchio Made in Italy di Atlas Concorde è sinonimo di stile, qualità ed etica. Avendo aderito con convinzione al Codice Etico di Confindustria Ceramica, Atlas Concorde appone il marchio Made in Italy su tutti i prodotti studiati, progettati e realizzati in Italia, nella fattispecie tutte le piastrelle di ceramica, le decorazioni e la maggioranza dei pezzi speciali. Solo un ristretto numero di questi ultimi è fabbricato in Spagna. I prodotti Atlas Concorde sono inoltre realizzati con tecnologie rispettose dell'ambiente, utilizzando materie prime eccellenti e sicure, garantendo le migliori condizioni di lavoro. Per queste ragioni il Made in Italy di Atlas Concorde è espressione di valori forti quali stile, design, qualità del prodotto, attenzione all'ambiente e alle persone.

Ceramics of Italy

The Ceramics of Italy logo is an exclusive identification on ceramic products which have effectively been made in Italy by companies that are a part of the Confindustria Ceramica and who adhered to its Ethical Code. This Code, promoted and created by Confindustria Ceramica, commits all companies to communicate, clearly and with transparency, the origin of their products.

Il marchio Ceramics of Italy contrassegna esclusivamente i prodotti ceramici effettivamente realizzati in Italia da un'azienda associata a Confindustria Ceramica che ha sottoscritto il Codice Etico. Il Codice, redatto dalla stessa Confindustria Ceramica, impegna a comunicare con chiarezza l'origine dei prodotti.
